SULTANATE OF OMAN

(Governorates & Wilayats)

Praise be to Allah and Peace be upon His Messenger, Mohammed

Education is key for personal development, and it provides a wealth of opportunities in life. The commitment and efforts we put into education are some of the most fundamental investments we can make towards securing the future wellbeing of Oman and its citizens.

Our education system has been the bedrock of our development. It has provided this generation and those before it with the skills and knowledge that have driven the country's growth and, with it, our prosperity. But to meet our high aspirations as expressed in Oman's Vision 2040 amidst an increasingly competitive global environment, we cannot stand still.

To compete with the best in the world, our education system must develop young Omanis who are knowledgeable, think critically and creatively, have leadership skills and are able to communicate effectively in English with the rest of the world. Just as importantly, our students must be instilled with values, ethics and a sense of citizenship that will empower them to make the right choices for themselves, their families and the country.

Given Oman's historical and geographical profile, mastering English as a second language is an absolute necessity for all our students. It is the language of international communication and is also the main language for studying other subjects all over the world. Therefore, the Ministry took the decision to adopt and customise an international series called 'Team Together' that is benchmarked to the Global Scale of English (GSE) and the Common European Framework of Reference for Languages (CEFR), both of which are internationally recognised standards for describing language ability.

This series is based on the most cutting-edge research on teaching and learning. It will embed and develop Future Skills such as critical and creative thinking, as well as encourage holistic, well-rounded personal growth. This series will prepare our children to meet the challenges of a pluralistic society that welcomes diversity, a knowledge-based job market that is constantly evolving, and economic globalisation.

Finally, I hope that you find this book useful and enjoyable, and use it in your everyday lives, as this will enable us all to contribute to the success of our beloved country – the Sultanate of Oman – as led by the inspiration and wisdom of His Majesty, Sultan Haitham Bin Tarik.

I would like to take this opportunity to wish you every success in life.

Dr. Madiha bint Ahmed Al-Shaibani

Minister of Education

Good manners around the world

There are many different ways to be polite or rude around the world! Let's look at what good manners are in different countries.

Saying please and thank you

All around the world, it's important to say 'please' and 'thank you'. In the UK, if a child asks 'Can I have some water?', a British parent often asks 'What's the special word?' The child then remembers to say 'please'!

And do you know that in the UK most people say 'thank you' to the bus driver when they get off the bus?

Fun fact

Did you know that in Japan it's rude to laugh with your mouth wide open?

Being with people

In Oman, it's polite for men to give a firm handshake when they meet someone. In some parts of Asia, the opposite is true: it's better to give a gentle handshake!

handshake

In Oman, it is polite to invite people to your home. When you go to someone's house for a meal, take a small present and remember to take off your shoes when you go inside.

Good manners with food

In the US and the UK, it's polite to finish everything on your plate. In China, it's very rude to do that! If you finish everything, it means you didn't get enough food.

In the US and the UK, it's polite to eat quietly. In China, it's better to eat noisily. This shows that you are enjoying your food.

The Baking Day

Arwa and Areej are baking a cake today. The children bake in pairs. Arwa and Areej are hard-working, but Arwa is more confident than Areej. Arwa is also kind, and the friendliest person at the baking day.

Areej reads the recipe. She gets a bag of sugar, some butter and some flour. She counts the eggs. There are three bowls.

Areej and Arwa are very tidy. They tidy up the eggs, sugar, butter and flour. But there is a problem with the cake.

This recipe is for eight people. Did we count badly?

I think we baked a cake for eighty people!

Later, they take the cake from the oven. It's the biggest cake ever. It's taller than Arwa and Areej! It's the most delicious cake, too.

Thank you for helping me, Arwa. The cake is amazing! Next week, let's make a pizza.

I'm not very good at making pizzas, so you can help me!

The Tennis Lesson

The boys are playing tennis in their P.E. lesson. Hisham is hard-working, but he isn't confident in P.E. lessons. He's very shy. He'd rather paint a painting in Art or do experiments in Science.

I'm really good at painting and doing experiments, but I'm terrible at tennis. I'm the worst in the class!

Hamed is the best in the class at playing tennis. He is good at throwing a ball, and he easily hits the ball with his racquet.

Hisham is hard-working, but when he hits the ball, where does it go? It always hits the net!

Hamed is very kind and polite. He shows Hisham how to hit the ball with his racquet. Hisham listens carefully to Hamed.

Then Hamed throws the ball to Hisham.

Now Hisham is great at hitting the ball! The ball easily goes over the net. Hisham is really happy. He is the happiest person in the class.

Thank you for helping me, Hamed! Let's play tennis!

Yes, they were.

World museums

Last year I visited some amazing museums.
I love learning about the past and in these museums
I learnt a lot of different things.

Oman Across the Ages

When I went to the Wilayat of Manah, I visited the Oman Across the Ages Museum. It is a beautiful and very large modern building. I learnt a lot about Oman's history. There were ancient tools, old photographs, paintings and model boats. There was so much to see and do. It was amazing.

Fun fact

The Oman Across the Ages Museum uses technology so that you feel you are living in the past!

Shanghai Museum of Science and Technology

I like science and technology, so I love this museum in Shanghai, in China. You can explore technology from today and also learn about Chinese inventions from hundreds of years ago. There are lots of activities for children. I did a science workshop and learnt all about robot design. I also watched a film about exploring space. It was fantastic!

Natural History Museum

I visited this museum in London, England, on holiday. Here I saw a T-Rex and a blue whale, and I learnt about plants and volcanoes! Do you know what an earthquake is? It's when the earth shakes! At the Natural History Museum, I went into a room and the floor started shaking like an earthquake! It was so exciting!

Majid's science blog

How cardboard is like a bridge

- 1 Hello, everyone! Today, I visited a museum and found out a lot of amazing information about cardboard!
- 2 In 1879, a Scottish engineer called Robert Gair invented the cardboard box. Robert Gair could make a lot of cardboard boxes very quickly, and so for the first time, food companies could use cardboard to hold food. In 1906, a food company started using very thin cardboard boxes for its cereal. This was the first time that a box had the name and picture of the food on the outside!
- 3 Today, we use cardboard boxes for many different things because cardboard is so strong.
- 4 Do you know why cardboard is so strong? Inside each piece of cardboard, there are a lot of triangles. Triangles are really strong: they can carry a lot. Do you sometimes make a house of cards? If you use triangles, it works. If you try it with square shapes, it doesn't work. Try it and see! The triangle shape is the strongest.
- 5 I learnt that there are triangle shapes everywhere: in bridges, in houses, on bikes and even on kites! Look at these pictures. Can you find the triangles?

Report: My visit to the Louvre Abu Dhabi

On 20 September, I visited the Louvre Abu Dhabi, United Arab Emirates with my family. It has around 700 paintings from around the world. It's special because the building is very modern. I think it's very beautiful, with lots of light. We walked around the building. Then we went inside and looked at the art. You could see many different types of art from history, and also furniture, statues and jewellery. I learnt a lot about history and modern buildings when I was there.

Tip Writing

With a report about a visit, you are giving information to your reader. Start with the date of the visit. Then organise your work into paragraphs.

4 Write a report about your visit to a museum or another interesting place.

1 Plan

- Where did you go?
- What's special about it?
- What could you do there?
- What did you learn?

2 Write

- 4 Who is thinking about posting a letter?
- 5 Who is sending an email?
- 6 Who is learning something new?
- 7 Who is making a face?

2 What couldn't you do when you were five that you can do now?

I couldn't ride a bike when I was five, but now I can.

Challenge

Challenge your classmates and play the game!

Work in two teams. Look back through the unit to find the answers to these questions.

At the Technology Museum

Last Saturday, Ivy visited a Technology Museum with her mum.

Good morning.
I'd like some information
about this room, please.

What can we
see and do here?
Can I learn
about the past?

Yes, of course. What do
you want to know?

Yes, you can.
You can play old computer
games, listen to music and
use old telephones.

Look, Mum. You couldn't send an email on this computer, but you could play games. You use the keyboard to play this game. It's fun!

Everything was very different 40 years ago! We didn't have tablets or mobile phones, but I loved playing computer games. They were fun!

Then Ivy found some unusual things in the museum. She saw something and made a face.

What are these, Mum?
Are they telephones?

Yes, Ivy.

Those telephones are very old. Many years ago, telephones didn't have buttons. Look, this telephone is newer.

It has got buttons.

And what's this?
Is it an old computer?

No, Ivy. This is a letter box! You can buy a postcard in the museum shop and post it here.

Oh, of course! A letter box. Let's buy a postcard for Granddad. Posting a letter or a postcard is more interesting than sending an email!

The Special Race

Khalid found an old medal. He asked his dad about it. When Dad was young, he was really good at running. He also studied Science in Britain. When he was in Britain, he ran lots of races. This race was special because he ran in a penguin costume.

Look, I've got some great photos on my tablet. Do you want to see them?

Yes, please!

Wow! Look at your wings and your long beak. When you were in your penguin costume, could you run?

Yes, I could run slowly in my penguin costume. I tried to run quickly but I couldn't!

I could see my trainers, but I couldn't tie my shoelace. My friend tied my shoelace for me!

How did you drink?

I could carry a bottle of water, but I couldn't open it very well. The water went everywhere. But not in my beak!

FINISH

At the end of the race, I couldn't call my friends because we didn't have mobile phones then. But they found me quickly in my penguin costume!

Did you win the race, Dad?

No, Khalid. I couldn't win the race in a penguin costume! But winning wasn't important. I had my medal. And my photo was in the newspaper the next day. Look!

That's great!

Frankincense Land

Frankincense comes from trees and it smells very nice. You can use it for many things.

In the past, frankincense was very important. People used it for perfume and also for medicine. They believed it helped your heart and also helped you to breathe. Frankincense trees don't grow in many places, but many grow at Wadi Dawkah in the south of Oman.

More than 2,000 years ago, people sold a lot of frankincense to countries around the world. The frankincense helped the towns of Al Balid and Khawr Ruri to grow into important ports where boats took the frankincense to markets in other countries.

As the frankincense was important, they built big walls and forts to guard the ports. Events in history changed these ports and today Al Balid and Khawr Ruri are ruins, but it is very interesting to visit them. Al Balid has a fascinating museum, too, called the Museum of Frankincense Land, where you can learn about the history of the area and the different uses of frankincense.

Fun fact

Did you know that some people use frankincense as chewing gum?

1 **Before you read** What do astronauts do on the International Space Station?

I think they ...

2  Listen and read.

LIFE ON THE INTERNATIONAL SPACE STATION

The International Space Station (ISS) is a satellite. It goes around the Earth once every 90 minutes. It travels at 28,000 kilometres per hour! Ten astronauts live on it. They come from many different countries. The ISS astronauts travel around the Earth many times a day, so they see 16 sunrises or sunsets every 24 hours!

The astronauts have a lot of jobs to do every day. They do experiments to find out more about space. They fix the station and, sometimes, they put on their spacesuits and walk outside the station!

When they aren't working, astronauts read and take photos. One astronaut, Commander Chris Hadfield, became famous when he took beautiful photos of the Earth and put them online.

There's one more important thing for astronauts to do: exercise! People are weightless in space, so their muscles can become very weak. To keep their muscles strong, astronauts need to exercise for two hours a day. That's a long time!

Commander Chris Hadfield

3 **After you read** Complete the sentences. Write one or two words.

- 1 The International Space Station is a _____ with astronauts on it.
- 2 It goes round the Earth once every _____.
- 3 The astronauts _____ every day to find out more about space.
- 4 Outside the station, they need to wear _____.
- 5 _____ is very important for astronauts because their muscles get weak in space.

Listening

- 1   Listen and circle the correct answer.
- Helen Robertson is a **British** **American** astronaut.
 - Helen spent **235** **247** days on the International Space Station.
 - On the ISS, Helen's favourite hobby was **using a telescope** **looking out of the window**.
 - The astronauts got more food by **rocket** **satellite**.
 - The rocket was about **7** **70** metres tall.

Speaking

- 2 Imagine you're an astronaut on the International Space Station. What will you do if ...
- you need to make some food?
 - you need to repair something outside the station?
 - you need to wash your hair?

Writing

- 3 Read. What is the blog post about?

Hi, this is Astronaut Ali! I'm on the International Space Station, and my blog post today is about food. What do astronauts eat?
 In space, we have three meals a day, just like on Earth. But all our food is in bags. You need to add water to some types of food. We have a lot of different types of food, but we don't have food with a lot of crumbs, like biscuits or cakes. If we drop crumbs, they float around, and that's a problem for us!

 Writing

Use questions to make your writing more interesting. Can you find the question in Ali's blog post?

- 4 Imagine you're an astronaut on the International Space Station. Write a blog post.

1 Plan 

Choose from these topics: food, clothes, repairs, hobbies. Find out more about these topics on the ISS! What do you eat/wear/do? How is it different from on Earth?

The Space Race

It's an exciting day for the class. They are learning about the solar system in Science and this afternoon they will have a space race.

The children get their costumes ready for the space race. Some children will dress up as rockets and others will dress up as planets and stars. Faisal and Hazim will dress up as astronauts.

The teacher, Mr Osama, starts the race and the boys run fast. They get to the tree and then they start to run back to the teacher.

But Hazim sees a squirrel in the tree. He looks up and then he falls over.

Faisal and the other boys run back to Hazim. They help him to get up.

The boys run with Hazim and they finish the space race together.

The New Telescope

Reem has got a new telescope. Her sister Arwa is very excited because they will use it for the first time this evening.

Arwa runs out to the garden and Reem follows her. There is no Sun and it's dark now. Reem sets up the telescope and Arwa looks through it.

Wow! Look at the stars. How many stars are there in space, Reem?

There are millions of stars in space, Arwa!

Look! I can see the Moon. How far is the Moon, Reem?

It's really far! It's over three hundred thousand kilometres away!

Arwa really likes looking through Reem's telescope.

I can see Mars! How big is the red planet, Reem?

It's really big, Arwa, but it's not as big as Earth.

I think I can see a space station, Reem. It's moving fast!

Arwa points at the sky. She can see something. What is it? It isn't a space station. It's a bat! Bats come out at night to find food. Then they sleep in the day.

It's a bat!

Wow! I saw a bat!

Well done, Arwa! But we sleep at night, so now we have to go to bed!

Which shop will you go to when you need something quickly, or when you want to spend your pocket money? Do you have to go to a supermarket or a shopping mall? Or will you go to a corner shop, where it's quick and easy to get what you need?

Most corner shops sell sweets, food, drinks, newspapers and magazines. In the UK, corner shops also sell stamps, cleaning products and stationery, such as pens and birthday cards.

In Australia, a traditional corner shop is called a *milk bar*. In New Zealand, it's called a *dairy*. In the past, milk bars and dairies sold a lot of milk and ice cream, and some were also cafés where you could eat and drink. Now they usually sell a lot of different foods and drinks, as well as milk and ice cream.

In North America, there are many different names for corner shops! In New York, a corner shop is often called a *bodega*. In Canada, it's a *corner store*. There are many names for corner shops, but one thing is the same: we all buy things from them!

Fun fact

Hi Dana

Last week, I went to the shoe shop with my friend Rasha. I noticed some shoes in the window and I really liked them! They were blue and very pretty. 'Buy them quickly,' said the shop assistant. 'These are my last blue shoes,' he said. I did not have enough money to buy them. 'Tell your dad,' said Rasha. 'Perhaps he will buy them for you.'

The next week, I went to the shoe shop with my dad.

'Where are the blue shoes which were in the window?' I asked the man.

'Sorry, I sold them!' he said. I was very sad.

On Tuesday, it was my birthday. My mum and dad gave me a present in a box. I opened the box. What was inside? The blue shoes!

'These are the shoes which I liked!' I said. 'How did you know that I wanted them?'

'Your friend Rasha told me,' said Mum. 'So I bought them before you went to the shop with Dad.' I was very happy.

'Try them on,' said Mum.

'They fit me!' I said.

Look at this photo. I'm wearing my blue shoes!

Writing

Hi Sharifa,
 You asked for some advice about good places to shop in my city.
 On Long Street there are a lot of great shops and there's also a market where you can buy delicious food. There's a fishmonger's, a butcher's and a greengrocer's at the market. I love the apples and pears which you can buy from the greengrocer's!
 There's a big shopping mall where you can buy clothes and presents. There are gift shops, a jeweller's, shoe shops and a big toy shop which is called Kids Toys. My favourite shop is the toy shop, of course!
 You'll have to bring all your pocket money!
 Love from Nada

The Planets in our Solar System

There are eight planets in the solar system and they all go around the Sun. Our planet is called Earth and it goes around the Sun every 365 days. That is one year! Earth also has a moon. We can live on Earth because there is air and water here. Most planets and moons do not have these.

The nearest planets to the Sun are called Mercury and Venus, then we have Earth. Some planets are very far from the Sun. The furthest are called Uranus and Neptune.

The biggest planet is called Jupiter. It is 11 times larger than Earth and has more than 90 moons! Saturn is amazing, too. This planet has 146 moons and a big ring around it!

The other planet is called Mars and it has the highest mountain in the solar system. It is called Olympus Mons and it is three times higher than Mount Everest!
