Red Nose Day

Why would millions of British people spend a whole day wearing huge, red, plastic noses? For charity, of course! Red Nose Day takes place every year, in March, and is part of Comic Relief Week. For a whole week, people take part in activities to raise money for the charity organisation Comic Relief, which was set up in 1985 by comedy scriptwriter Richard Curtis and popular British comedian, Lenny Henry. The main difference between Comic Relief and other charity events is that people do something funny for money, from sponsored fun runs and cycle rides to sky-diving and roller-skating. Many of these events are filmed by TV camera crews around the country.

On Red Nose Day, many people in Britain wear a red nose (or at least buy one to support the event). It is also the day when they send in the money they have raised to Comic Relief. They pay the money into the charity's bank account where it is added to the total amount raised. (The sale of red noses also raises lot of money for Comic Relief.) The total is regularly updated and reported on BBC television. In fact, Red Nose Day is a huge televised event which starts in the afternoon and goes on late into the night. The normal TV programmes are replaced with a live show hosted by different celebrities. Everyone works for free,

including the camera crew and the production teams. During the show, the presenters introduce specially recorded comedy sketches and funny versions of popular TV shows.

Over the years, many big film stars have taken part in Red Nose Day, including Rowan Atkinson (*Mr Bean*), Ewan McGregor (*Star Wars*) and even Hollywood actor, Johnny Depp (*Pirates of the Caribbean*). Pop music stars also get involved by recording charity songs, and well-known TV personalities take part in different events, such as singing competitions. Since the first Red Nose Day in 1988, famous people have also taken part in various challenges, such as climbing to the top of Mount Kilimanjaro in Tanzania.

There is also a serious side to Red Nose Day. Comic Relief sends famous people to report in countries in Africa, where there is a lot of famine and poverty, and where comic relief has many of its projects. During the televised show, they make emotional appeals to the public to send money to help the people there. British charities also receive some of the money raised. Since Comic Relief started, the charity has raised over £1 billion, and has helped people in more than 70 countries.

Kim: That's easy. I think the best documentary is *Blue Planet*.

Zoe: Really? (1)?

Kim: (2) You learn about the most amazing sea creatures.

Zoe: (3) I saw an episode the other day. I thought it would be a bit boring, but it was brilliant! What's the next category?

Kim: It's 'best TV drama series'.

Zoe: That's easy. It's *Doctor Who*.

Kim: (4)

Zoe: Yes, I do. The special effects are great and the storylines are really

gripping. And the actor who plays *Doctor Who* now is really cool.

Kim: I agree. (5) But I'm not keen on sci-fi and strange monsters. I think there are much better programmes on TV.

Zoe: So, which TV series would you vote for?

Kim: I'm not sure. Maybe *Emergency Room*. I imagine a lot of people will vote for *Emergency Room*, don't you?

Zoe: Actually, (6) It's too serious. In my opinion, the best dramas are ones which are sometimes funny as well.

Kim: Maybe you're right. OK, so what's the next category?

Zoe: It's 'best TV presenter'.

Kim: Oh, that's a bit more difficult. I'll have to think about that one.

Writing: a review

6 Read Zoe's review of the film *Moon people*. Match the topics (1–5) with the paragraphs (a–c) in which the reader can find it.

- 1 what the film is about
- 2 positive comments
- 3 the main actors
- 4 who will like the film
- 5 negative comments

7 Complete the review. Match the sentences (a–e) with the gaps (1–5) in the text.

- a Oscar Smyth is the best actor, in my opinion.
- b On the other hand, the script is not very good.
- c In conclusion, the film is interesting and most teenagers will enjoy it.
- d On the one hand, the film is very entertaining.
- e The space station and the moon look very realistic.

8 Complete the sentences with *because* or *because of*.

- 1 The space station is in danger a strange virus.
- 2 Doctor Shine has come to the space station he can help to kill the virus.
- 3 Jim Crane is dangerous he wants to keep the virus alive.
- 4 Some of the scenes were funny the bad dialogue.
- 5 Teenagers will like the film it has lots of action.
- 6 The film is disappointing its weak ending.

9 Make notes about a film you have seen recently. Then write your own film review. Organise your writing into three or four paragraphs.

A review of *Moon people*

a *Moon people* stars Cameron Blake as Doctor Shine and Bella Mancini as Krista. The story is set in the future and Krista is a scientist on a new space station on the moon. However, a strange virus is attacking everyone there. Although it doesn't kill them, it affects their memory. There is real danger. Soon there will be no-one who can operate the systems which keep the station habitable. Doctor Shine, an expert virologist, has recently arrived. He and Krista must work together to try to kill the virus – but the chief scientist, Jim Crane, wants to keep the virus alive.

b (1)..... This is because there is a lot of action and suspense. I also think that the acting is quite good. (2)..... Smyth plays Jim Crane and makes a brilliant villain. The action scenes are also very good. (3)..... This is because of the excellent special effects. (4)..... Although there is plenty of humour, the dialogue is so bad in places, that it is funny when it is supposed to be serious.

c (5)..... There is plenty of action to keep a young audience entertained. However, the film doesn't have a strong story and the ending is disappointing.

A review

1 Look quickly through the review.

- Is it for a book, a magazine or a website?
- What kind of information does the book, magazine or website include?

News for all

'News for all' is an international news website in English. It has up-to-date information about everything that is going on in the world today. The writers come from many different countries and the website has a very good reputation.

You can find out about news, sports, culture and much more on this site. There are news sections for different regions in the world. These include all the key stories from those countries, and there are live updates as you read. The sports sections has all the recent results, lots of photos, and some videos of major events. The culture section is very broad and it has everything from novels to internet influencers.

Overall, I can definitely recommend this website to anyone interested in reading and watching international news in English. However, there are some things I am not sure about. On the one hand, the use of multimedia makes the website interesting, but on the other hand, the different video sections sometimes make the website confusing. Personally, I prefer reading the information rather than watching videos. However, I know many people don't agree.

Reading

5 Read the text and match the paragraphs (1–3) with the headings (a–d). There is one extra heading.

- a** A mystery escape **c** Animal artists
b Tricking the trainers **d** Great escapes

Animal tricksters

Have you ever played a trick on someone? If so, then you know that you need to think and prepare carefully for your trick to work. You have to guess how the person will act. Then you have to find a way to trick them. In other words, you need to be quite intelligent.

(1)
 Some animals have proved their intelligence by playing tricks on humans. A dolphin named Kelly knows how to trick her trainers to get more food. They taught her to keep her pool clean by collecting the rubbish that fell into it. When she gave it to a keeper, she got a tasty piece of fish as a reward. Now, when paper drops into her pool, she takes it to the bottom of the pool where she hides it. When the trainers come, she swims down and tears off a small piece of paper. She gives it to the trainer, who gives her some fish in exchange. Kelly also knows that big pieces of paper get the same reward as small pieces, so she only tears off small pieces to make the paper last longer!

(2)
 Other animals have used their brains to think of escape plans. One female elephant used her intelligence to escape from the animal park where she lived. She used her trunk to take off the bolts on a locked gate. Then she opened the gate and let all the elephants out. Apes are also skilled escape artists. They have been escaping from their cages since zoos were first invented. They are very creative and have used every trick in the book to get out of their enclosures. They have stolen keys from their keepers, built ladders and picked locks. One orangutan even used sticks to damage the wires to an electric fence. She then escaped without getting a shock.

(3)
 Birds are also clever creatures. Chuva the parrot from Vancouver Zoo, Canada, showed amazing skill and intelligence when she escaped from her enclosure. Although she could not fly because her wings had been clipped, Chuva got out of her cage and into the zoo's car park without being seen. Knowing that she could not fly, she hid inside the engine of a large car and rode out of the zoo in style. After three days, the car's owners found her and took her back. Nobody really knows how Chuva got out of her cage or how she got into the car. But she is certainly a creative thinker!

6 Read the text again and answer the questions.

Which animal(s) mentioned in the text:

- 1 tricked some humans by using their knowledge of how they react?
- 2 used logic to understand how electricity works?
- 3 managed to escape despite a great disadvantage?
- 4 regularly escape from captivity?
- 5 helped other animals to escape?
- 6 knew that cars were a means of transport?

7 Choose the correct answer a, b or c.

- 1 It's necessary to be quite intelligent if you want to:
 - a train dolphins.
 - b play a trick on someone.
 - c work with animals.
- 2 Kelly's trainers rewarded her with extra fish if she:
 - a collected bits of rubbish.
 - b found big pieces of paper.
 - c did tricks underwater.
- 3 How did the female elephant use her trunk to escape?
 - a She took the lock off a gate.
 - b She knocked down a gate.
 - c She unlocked a gate with a key.
- 4 Apes that live in zoos:
 - a don't often escape.
 - b have used books to play tricks.
 - c have often shown a lot of intelligence by escaping.
- 5 Chuva the parrot:
 - a now lives with the people who found her.
 - b used 'parrot talk' to explain how she escaped.
 - c was not seen escaping from the zoo.

Writing: a description of people

- 5 Read Katie's description of herself. Choose the best adjectives to describe her personality.
- a introvert and shy
 - b extrovert and sporty
 - c intelligent and artistic
- 6 Complete Katie's profile. Circle the correct options.

Hi. I'm Katie. I'm really sociable and love meeting new people! I ask lots of questions, which / who makes people think I'm nosey. This isn't true at all – I'm just (1) *very / a bit* interested in everyone!

I'm (2) *a lot / very good* at sport, especially basketball. In the area (3) *that / where* I live there isn't a girls' team,

so I have to get up early at weekends and travel across town. My sister, (4) *whose / which* favourite hobbies are tennis and drama, thinks I'm mad! But it's great fun and I don't mind the early mornings.

Apart from sport, I like listening to music and reading. My favourite time of the day is (5) *when / where* I come home from school. I go up to my room, (6) *which / that* is calm and peaceful, put on an mp3 and relax on my bed. I'm not a messy person, so it's usually clean and tidy and I stay there until my mum calls me for my dinner.

One other thing: I'm (7) *quite / very interested* in science. I really enjoy watching documentaries about the universe.

7 Complete the sentences with a relative pronoun.

People *who* don't know Katie think that she's nosey.

- 1 Her favourite sport, is basketball, is not the same as her sister's.
- 2 The place Katie plays basketball is the other side of town.
- 3 Katie's room, is always tidy, is her favourite place.
- 4 In the afternoons, she gets home from school, Katie listens to music.

8 Complete Jem's personal description. Include the example information below.

Hi. I'm Jem. I'm an extrovert. I like talking to people and (1) about them. I also like going out. At the weekends, I don't like staying at home, I (2) with my friends – I'm very (3) My friends, who go to the same school as me, say that I'm (4) because I'm good at telling jokes. People always laugh at them. I think I'm quite clever because I usually get (5) at school. In my exams, which I did last month, I got all 'A's. My bad points are that I'm very messy. My bedroom, where I do my homework, has (6) all over the floor. I'm quite artistic too. I like to paint and draw. I (7) my own room.

Name: Jem

Personality	Example	Extra information
extrovert	I'm sociable and go out with my friends a lot.	I like talking to people, finding out about them.
funny	Good at telling jokes - people laugh at them.	My friends, who go to the same school as me, say I'm funny.
very messy	There are lots of clothes on my bedroom floor.	I don't like tidying my room.
quite clever	Get good marks.	'A's in my exams last month.
artistic	I like to paint and draw.	I decorated my own room.

- 9 Make notes about your personality. Choose adjectives and write down ideas for each adjective. Use the example above to help you.

- 10 Now write a personal description. Use relative pronouns where possible.

Reading

1 Read the How to... box. Write one word in each gap (1–3) to complete the useful strategies.

HOW TO ...

identify the main ideas of sections of a text

Match headings with the correct sections of a text. There is often an extra heading.

- Read the whole text quickly before you look at the (1) h....., and identify the main idea in each section.
- If the headings are questions, predict the kind of (2) i..... that answers the question. Then look for this information in the text.

Important! Make sure the extra heading doesn't (3) m..... any of the sections.

2 Check your answers to Exercise 1 at the bottom of the page. Now use the strategy to do these activities.

1 Read part of a text about a person with remarkable abilities and match the correct heading (a–c) with the paragraphs (1–2).

(1)

Daniel Tammet is a 'savant'. This word refers to people who have amazing abilities. In Daniel's case, he has an astonishing gift for maths and languages. He speaks ten languages fluently! On the other hand, he has a poor memory for faces and has Asperger's syndrome, a condition which affects his ability to make friends.

(2)

Daniel is different to other savants because he can actually describe what goes on in his head. He senses or feels calculations and sees numbers as attractive or ugly. According to Daniel, the number 9 is large and impressive and pi (3.14) is particularly beautiful.

- a A special case
- b Living with Asperger's syndrome
- c Extraordinarily talented

2 Read part of a text about Britain's most accident-prone man. Match the correct heading (a–c) with the paragraphs (1–2).

(1)

When John Lynne was a child he fell off a horse and was immediately run over by a van. When he was a teenager, he fell out of a tree and broke his arm. After several days in hospital, he went home on the bus. The bus crashed and he broke his arm again.

(2)

As an adult, John Lynne has had about twelve serious accidents which nearly killed him. For example, he has been hit by lightning and by falling rocks in a mine. He has also been in three major road accidents.

- a Car crashes
- b Childhood accidents
- c Lucky to be alive

Listening

3 Read the How to... box. Write one word in each gap (1–3) to complete the useful strategies.

HOW TO ...

identify detailed information

Listen to a text or conversation and choose the correct option. The options can be text (words, numbers, times, etc.) or pictures.

- Read the task and the options before listening.
- For (1) t..... options, think about the pronunciation of each option.
- For (2) p..... options, think about what distinguishes each option.

Important! Don't try to (3) u..... everything. Listen only for the answers to the questions.

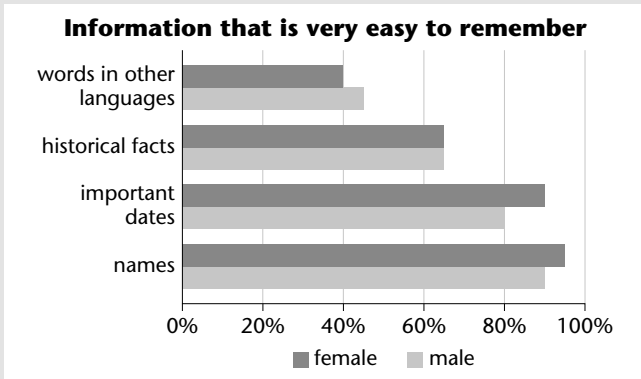

4 Check your answers to Exercise 3 at the bottom of the page. Now use the strategy to do this activity.

2.3 Listen to the conversation. Which bird are they talking about?

A description of data

1 Use the data on the chart to answer the questions.

- Which type of information is easiest to remember for males and females?
- Which type of information do males and females have the same opinion about?
- Which type of information has the biggest difference in answers between males and females?
- For the answer to question 3, what is the percentage difference between males and females?
- Which type of information has got the lowest percentage for females?
- Which type of information has got the highest percentage for males?

2 Read the description of data below. Circle the points the writer describes on the chart.

The types of information men and women find easy to remember

The chart shows the results of a survey about how easily people remember information. Males and females were asked about four different types of information: ¹**these** were words in other languages, historical facts, important dates and names.

The chart shows there are differences, but ²**it** also shows the differences are not big. Overall, males and females had similar views on all four types of information. ³**They** agree that names are the easiest type of information to remember and important dates are the second easiest.

It is clearly seen that males and females thought that words in another language are the most difficult to remember. Exactly 40% of females and almost half the males thought ⁴**they** are very easy to remember. Approximately 60% of males and females think historical facts are very easy to remember.

Females found it easier to remember names and important dates than males. In contrast, males found remembering words in other languages easier than females.

3 Review the four paragraphs in the description of data and complete the Writing Skill box with the verbs from the box. Then check your answers with Student Book p27.

WRITING SKILL

Organising information logically

Well-organised writing is easy for readers to follow. Organise your writing logically to help the readers understand what you are saying. Follow this model:

Paragraph 1:

..... the chart.

Paragraph 2:

..... the findings on the chart.

Paragraph 3:

Use data/details to a key feature of the chart.

Paragraph 4:

Use data/details to a key feature of the chart.

4 Choose the correct reference word. Then check your answers with Student Book p28.

WRITING MECHANICS

Using reference words

We can use reference words to refer back to something mentioned earlier in the text.

*The chart shows the results of a survey of teenagers in Oman. **They / He** were asked which factors ... **they / he** thought affected **his / their** memory most.*

*As far as **the boys'** preferences are concerned ... Nearly 70% of **them / him** have expressed a wish ...*

*... the use of **electronic gadgets** affected memory, especially when people used **this / these** while studying.*

5 What do these reference words refer to in the description of data?

- these
- it
- They
- they

6 Can you remember the phrases for percentages and numbers? Complete the phrases in the box. Then check your answers with Student Book p28.

WRITING MECHANICS

Including percentages and numbers

Numbers and percentages can be represented in different ways.

a h ___ 50%

a t h ___ 33%

a q u _____ 25%

Sometimes we can use phrases to show numbers are not exact.

a l _____ one t h ___ 30%

n _____ one q u _____ 23%

j ___ o ___ a h ___ 54%

e x _____ four-fifths 80%

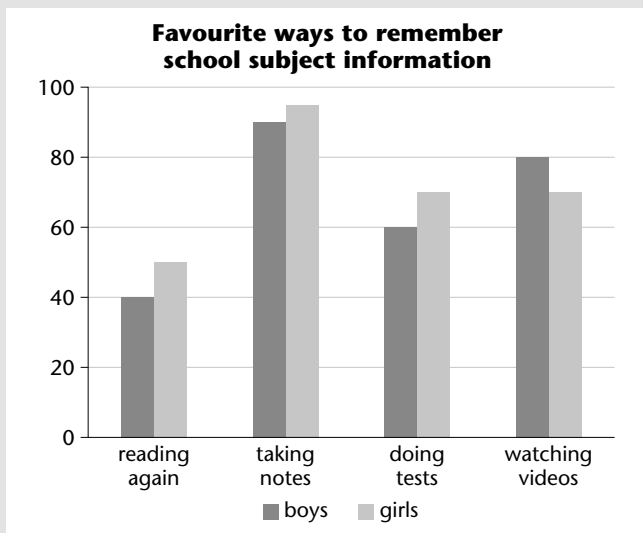

7 Circle the numbers, percentages and phrases in the description of data. Then write them in a different way below.

8 Use the chart below to answer the questions.

- 1 Which is the favourite way for girls to remember information?
- 2 Which is the least favourite way for boys to remember information?
- 3 What percentage of boys like doing tests to remember information?
- 4 Approximately what percentage of girls like watching videos to remember information?

9 Now describe the findings from the chart in 150 to 200 words.

- Use *Useful expressions* on Student Book p28.
- Make sure you organise your information logically, using reference words.
- Don't forget to include data.
- Look for opportunities to use relative clauses.

Reading

1 Look at the photos and read the text quickly. Match the diary entries (1–2) with the pictures (a–c).

Being a teenager in the 1980s

by Kara Williams

My mum's name is Diane. She grew up during the 80s, before the time of home computers, mp3s and the internet. Here are some extracts from her diary, which I think give a good idea of what life was like then.

1

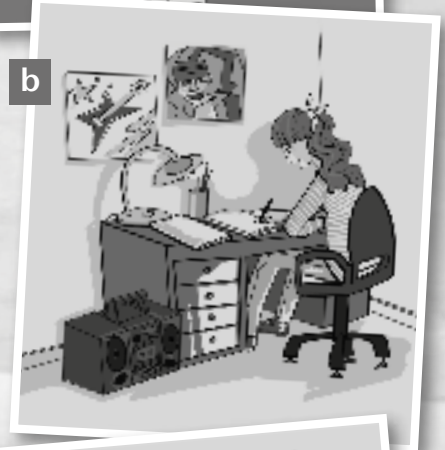

Saturday, 16th August

I've just got back from my friend Jessica's house. She'd invited me round to watch some videos she'd rented. I went to her house about five o'clock. When I got there, her dad was just on his way to the repair shop because the video player had just broken down. We decided to play video games instead on their new Hitari video console. Jessica set everything up and then showed me how to use the control stick. It was great fun. We played Pac-man and Space Invaders. After an hour or so, we felt a bit hungry so we went into the kitchen. Jessica's mum had prepared a really nice tea; there were cheese sandwiches, pizza slices and salad. After tea, Jessica suggested we went up to her room to listen to some music on her cassette recorder. She's got loads of cassettes of all her favourite groups. She likes the latest music, which has lots of synthesisers and electric guitars. I'm not so keen on this kind of music so, after a while, we just sat in her room and chatted about school and stuff. I left around 9 o'clock when my dad came to pick me up.

2

Sunday 17th August

Today was a typical Sunday. We all got up quite late and went to Grandma's house for lunch. I helped Grandma with the Sunday roast – I peeled the potatoes and chopped the vegetables and Mum prepared the meat. After we had eaten lunch, Annie, my sister, and I washed the dishes. We came home about 5 o'clock and had tea while Annie and I listened to the Top 20 on Radio One. Then I went to do my homework in my bedroom. I had quite a lot to do for my science project, but luckily I'd been to the library on Friday to do some research. I was just writing the last paragraph when the phone rang in the hall. It was Melanie. She was a bit annoyed because she'd phoned me several times on Saturday, but of course I'd been out. We don't have one of those new telephone answering machines, so I didn't know she'd phoned. We talked for ages. In the end, I had to hang up because I was feeling cold from standing in the hall. After that, I went into the living room, but my favourite programme had nearly finished. I was quite disappointed because it was the last episode in the series. In the end, I went to bed early and read my book.

An opinion essay

1 Read the essay title and write one sentence which gives your opinion. Then read the essay to find if the writer agrees with you.

Do you think we should learn about the history of the world or only the history of our own country?

.....

History is a very interesting topic, and everyone should study it. However, some people say that we only need to learn about the history of ¹our own country. In my opinion, the history of our own country is very important, but we need to learn about more than ²one. This is for a number of different reasons.

First of all, countries around the world are all connected. People used to travel in the past and we travel even more now. People have moved from other countries to Oman and ³the same thing happens all over the world. I believe in many ways we have a shared history. Furthermore, even if a country is very far from ⁴ours, there may be important lessons we can learn from their experiences.

Some people claim that we do not need to learn about countries we have never been to. In my view, I agree that Oman's history is the most important to us. However, I think we also need to understand people from other cultures and continents.

In conclusion, Oman and its history will always be the most important to me. However, I think we have a lot to learn from other cultures and the lessons ⁵some have gained from their own history.

2 Read the essay again and decide if the statements are true or false. Correct the false statements.

- 1 The writer doesn't think his country's history is important.
- 2 Everyone agrees with the writer's opinion.
- 3 The writer thinks we are connected to people all over the world.
- 4 The writer argues there is nothing to learn from other countries' experiences.

3 Read and complete the Writing Skill box. Then check your answers with Student Book p43.

WRITING MECHANICS

Giving your opinions

In an opinion essay, give / don't give your viewpoint clearly. However, you should / shouldn't consider other viewpoints as well. This will make the essay stronger / weaker and more / less balanced.

7 Write a sentence giving your opinion about the two topics below. Use phrases from the Useful expressions on Student Book p44.

1 Museums should be free.
.....

2 Everyone must learn about the past.
.....

8 Now write sentences with the opposite opinion from the ones you wrote in Exercise 7.

1
.....

2
.....

9 Read the essay title. Make notes about your opinion and other possible viewpoints.

No one is interested in the past so we don't need museums nowadays.

10 Now write your essay in 150–200 words.

- Include a clear introduction and conclusion.
- Use *Useful expressions* on Student Book p44.
- Use possessive pronouns and substitution words.
- Look for opportunities to use the past perfect and *used to*.

PLAN

.....

11 Read your essay and tick (✓) the checklist.

Have you:

- written in clear paragraphs?
- used opinion phrases?
- included possessive pronouns?
- used substitution words?
- used grammar from the unit?

Now prepare a final draft of your essay giving your opinion.

OPTIONAL

Give your final draft of your essay giving your opinion to your teacher to read. Does your teacher have the same opinion as you?

Hi,

I found some predictions from the 1920s and 1930s, which I thought were quite funny. This is what the 'experts' said back then!

Fifty years (1)..... now, nobody will travel by car anymore. They will shoot down tubes instead.

(2)..... 2020, men will (3)..... wearing jeans for every occasion except formal events.

In fifty years' (4)....., people will not walk around cities. They will travel in seats on moving pavements.

This time next century, most people will only work 15 hours a week.

So, what do you think? (5)..... any of these predictions come true? I certainly hope that I (6)..... be working less than 15 hours a week!

Sci-fi clothing

What will people be wearing five, ten or twenty years from now? Will clothes look much the same as they do today, or will they resemble something from a science-fiction movie? Scroll down to find out more about the latest uses of technology in clothes design.

1

It may sound like an idea from a sci-fi novel, but clothes that can purify the air have already been invented. Professor Helen Storey from the London College of Fashion and Professor Tony Ryan from the University of Sheffield have developed a *fabric* that cleans the air of pollution from factories and cars. People who wear the new clothes will be passing on cleaner air to the person walking behind them. They have called their invention ‘catalytic clothing’. However, the inventors want to spend more time doing research, so the clothes will not be available for at least another two years.

2

Nanotechnology will be the next big thing in fashion design. Fabrics are treated with nanoparticles to give them special qualities. These particles are invisible to the eye and are already used to make clothes and footwear that are *waterproof* and do not *stain*. Liquid that touches the surface simply forms a bead and rolls off. Sportswear has already been designed which takes sweat away from the body and onto the outside of the clothing. Chemicals can also be added to the fabric which will stop bacteria from growing. People working in deserts have already tested the technology. They wore the same clothes for several days, but found that they didn’t get dirty!

3

Dresses that change colour with your *mood*? This probably seems like an idea straight out of *Star Trek*. However, ‘smart clothes’ are tomorrow’s street fashion. Thanks to advances in LED (light-emitting diode) technology, it will soon be possible to produce electronic lights and screens which will be light enough to wear as part of your clothing. Sensors will cause lights to change colour each time your mood changes. Smart clothes will also allow you to change the patterns and designs on your clothes *whenever you like*. If you get bored with the design on your T-shirt, all you will need to do is download an image from the internet and onto an invisible screen.

7 Read the text again. Are the sentences true (T) or false (F)?

| 7 In the future, you will be able to download clothes from the internet. | <input type="checkbox"/> | <input type="checkbox"/> |

8 In the text, find the words and expressions in *italics* which mean the same as the underlined words.

Steve: Are you going to the fancy dress party on Saturday? It's going to be in the college garden.

Neil: I'm not sure.

Steve: Why not? Everyone else is going. It'll be fun.

Neil: I don't know.*d*..... I feel silly.

Steve: You don't have to wear anything fancy. You could go as a Roman soldier, or something like that.

Neil: Hmmm. (1)..... I don't want to get cold.

Steve: I'm sure you won't! It's summer. It'll be hot.

Neil: Actually, I don't like fancy dress parties. (2).....

Steve: Oh, come on! I'll go to the fancy dress shop and help you choose a costume if you like.

Neil: Maybe. I'll think about it. So, what will you be wearing?

Steve: I haven't decided yet. (3).....

Neil: Are you going to hire one from the shop as well?

Steve: Actually, I'm going to make one.

Neil: Won't that be a lot of work?

Steve: Not really. (4)..... You could make one too.

Neil: Thanks, but no thanks. (5).....

Steve: OK. OK. I won't mention it again!

a I think I'd rather wear something warmer!

b I don't want to go to the party, remember?

c I'd like to wear something really different.

d I don't really like dressing up and wearing costumes.

e Anyway, I prefer home-made costumes to hired costumes.

f In fact, I'd rather stay at home and watch TV.

- Where is the event going to take place?
- Who is organising the event?

7 Read the emails again and circle the correct options (1–6).

Hi Dina ,
 I've just seen your name on the list for the sponsored badminton tournament on Saturday. I'll be taking part in the morning, but I don't know exactly when yet. I'll phone the coach (1) *until / when* I get home. If you're playing at the same time as me, you could come round to my house first and we can go together. I only live five minutes' walk from the leisure centre. I'll send you another email (2) *when / by the time* I find out what time we're playing.
 Daisy

Hi Daisy,
 I'm playing in the morning too. I phoned the leisure centre this afternoon to check what time, but the receptionist didn't have the list. She won't know (3) *until / when* the badminton coach arrives later this evening. She's going to phone me back (4) *by the time / as soon as* she can. Anyway, (5) *until / by the time* you get home I'll probably know when we're playing. I'll send you a message later this evening (6) *by the time / as soon as* I know more.
 Dina

8 Complete the sentences with information from the emails.

1 Read the text and choose the correct option (a–c).

My passion for making furniture started when I was young. My grandfather was a skilled carpenter and he taught me everything I know. After university, I got a job as a manager in a furniture store, but I continued to work on my own designs in my spare time. I design mainly tables and chairs. I don't use a computer because I'd rather use paper and pencils. I make the furniture in my workshop, which used to be the garage. I spend most of my weekends in there. This year, I'm going to try and sell my work at a craft fair.

A formal letter or email

1 Abdullah is applying for a job. Read his email and complete the table below.

Dear Mr Hamad,

I am writing to apply for a summer internship in the City Museum, which I saw advertised on the museum website. Please find attached my CV.

I am in my final year at high school and I am looking forward to studying Business at university next year. I am a member of several clubs at school and I am a leader of one of these. In my role I give talks to other classes in English and I give presentations to teachers and parents. I have developed my confidence and that means I am now comfortable speaking to groups. I have good public speaking skills.

I feel I would be a good candidate for this role as I am interested in history, especially the history of Oman. I am a responsible, mature student with lots of knowledge about Oman and I love sharing this with other people.

I am available to attend an interview in May or June, and I am available for work in July and August. Please let me know if you require more information.

I look forward to hearing from you soon.

Yours sincerely,
Abdullah Al Balushi

Useful expressions for writing formal letters or emails

Begin: Dear + title + name.

.....

Explain why you are writing.

I am writing to apply for ...

.....

Use long forms (not contracted forms).

.....

Use a suitable 'closing' expression.

.....

I look forward to receiving your reply.

End: Yours sincerely, + your name.

4 Find expressions from the Writing Mechanics box in Abdullah's email.

5 Choose the correct words in the Writing Mechanics box about using reference words. Then check your answers with Student Book p56.

WRITING MECHANICS

Using reference words *this*, *that*, *these* and *those*

Reference words can refer to single or plural nouns.

This / These is a really interesting job. I'll really enjoy working here.

That / Those interview questions were really tough.

This and that can also refer to a complete idea.

I always work hard. This / That helps me to do well at school and in my summer job.

(In the sentence above *This / That* is a present reference to working hard.)

Our teacher made us work hard and this / that helped us with our work experience.

(In the sentence above *This / That* is a past reference to working hard.)

- 6 Read the email again from Abdullah. Find three examples of reference words. What do these words refer to?
- 7 Choose the correct reference word and underline what it refers to in the sentences.
 - 1 I am going to practise my interview techniques before the job interview. *These / This* will help me to feel more confident.
 - 2 Make a note of the questions. *That / These* are the type they will ask you at the interview.
 - 3 *Those / That* are adverts for university students. You need to be older to apply.
 - 4 I spent a lot of time writing my email and CV and *these / that* helped with getting the job.
- 8 Read the job advertisement. Make notes in the table to help you plan your email.

Reading

Study and Exam Skills – practise scanning and skimming in Exercises 1 and 2.

1 Read Becky's blog about the Fairtrade Foundation. Tick (✓) the products she mentions.

- balls baskets chocolate clothing
 coffee fruit jewellery pottery
 rice scarves soap tea

2 Read the text again. Choose the best title (a, b or c).

- a** What is Fairtrade?
b My trip to a Fairtrade community
c My week learning about Fairtrade

Last month, I did a week's work experience at the Fairtrade Foundation in London. I chose this organisation because we use such a lot of foreign products at home, and I wanted to find out about where they come from and who they are produced by. For example, a lot of our food comes from countries in South America and Africa. As the farmers in these countries don't have much economic power, they can't demand high prices. Did you know that a farmer sometimes only gets one penny of the 30 pence I pay for a banana?

The Fairtrade Foundation was started in 1992 to help farmers around the world get better and fairer prices for their products. It ensures farmers receive a fair price for their coffee, for example, one that does not fall below what it costs to produce. They also earn an extra amount, the Fairtrade premium, to decide for themselves how to invest in their communities and businesses. The first Fairtrade product here, in the UK, was Green & Black's Maya Gold chocolate. Nowadays, there are about 3000 products on sale in UK shops, including clothing, other types of food and drink, sports balls and beauty products.

The Fairtrade Foundation helps developing world communities to grow and gives people the opportunity to improve their lives in many ways. For example, with the extra money they make, parents can afford to send their children to school for the first time. I especially liked the way Fairtrade is improving women's lives in many communities. In Burkina Faso the women produce shea butter, which is sold in Europe and is used in cooking and in soaps and moisturisers. The money they earn is important to the local economy and, as a result, women are treated better and have more influence within their communities.

By the end of the week, it was clear to me how important Fairtrade is – and how easy it is to support. All you have to do is look for the Fairtrade label on goods in shops and supermarkets. As well as buying Fairtrade goods yourself, you can encourage your family and friends to start doing the same. You can even get your school to buy Fairtrade sports balls and school uniforms made from Fairtrade cotton. That's what I'm going to do this term! And there's a lot of information about organising a campaign in your school on the Fairtrade website.

Becky, North Devon, UK

Writing: a description of an object

4 Read about a present that changed Mandy's life. Answer the questions.

- 1 What was the present?
- 2 What was it like?
- 3 How did the present change Mandy's life?

When I was ten years old, my aunt gave me a set of three balls for my birthday. They were made of a soft, colourful fabric and each one fitted perfectly in my small hand. The other nice thing about them was that each contained a small bell which rang when the balls moved. The balls were for juggling with. As I don't have any brothers or sisters they were an especially good present for me because I could play with them on my own. After a while, I became really good at juggling and I decided that I wanted to join a juggling club. Since there wasn't a club in my town, I had to travel to the nearest big city, but it was well worth it! I've learned all sorts of other circus skills, including riding a unicycle and walking on stilts. Nowadays, I perform with the club at festivals and we all have a fantastic time. Those three little juggling balls really changed my life.

5 Rewrite the second sentence so that it means the same as the first. Use *as*, *because*, *since* or *so*. There may be more than one possible answer.

- 1 I didn't have any brothers or sisters so I used to play a lot on my own.
I used to play
- 2 The balls were a great present because I didn't need anyone to do juggling with.
I didn't need
- 3 I wanted to join a club because I was becoming quite good at juggling.
....., I wanted to join a club.
- 4 Since there wasn't a club in my town, I had to travel to the nearest big city.
There wasn't a club
- 5 I learned so many things, so the journey to the club was worth it.
The journey
- 6 I often perform at festivals as I'm really good at juggling now.
....., I often perform at festivals.

6 Think about an object (or objects) which has changed your life. Read the questions below and make notes.

- When did you get the object?

Read a text and either:

- a say if sentences about it are true or false,
- b choose the correct option, or
- c complete sentences.
- Read the whole (1) t..... quickly before you look at the task sentences.
- Read the task sentences carefully and identify the (2) k..... information in each sentence or option.
- Find this information in the text and decide if the task sentences express the same (3) i.....

Important! The task sentences often contain words which have opposite meanings to the text, or express similar information with synonyms.

2 Check your answers to Exercise 1 at the bottom of the page. Now use the strategies to do this activity.

Read the text. Are the sentences true (T) or false (F)?

The *Hanging Gardens of Babylon* were one of the original seven wonders of the ancient world. They were built in 600 BCE by King Nebuchadnezzar II to make his wife happy because she missed the green vegetation and mountains of her homeland. The gardens were built high above the ground on huge terraces. They were supported by massive stone columns and water from the river was pumped to the top to water the gardens. The gardens were destroyed by earthquakes around 200 BCE. However, some experts believe that the gardens never existed at all.

time expressions topic paragraphs sentences

WRITING SKILL

Using time expressions

Time expressions are used to sequence our ideas when describing the stages of the process.

At f _____, huge rocks ...

S e c _____, they are ...

A f _____ t _____, the water is ...

F o _____ t _____, the ore is ...

B e _____ the gold is sold ...

N _____, the powder is ...

F i _____, it is ...

WRITING MECHANICS

Ordering sentences

When you are writing processes, essays or reports:

- organise the in each paragraph logically.
- have a strong sentence.
- use sequencers such as to show connections between ideas.
- re-read your to check the order of ideas make sense.

- 5 Read part of a description for making cheese. Identify the sentence in the wrong place. Find a better place for it.

Following this, the solid part is separated from the liquid. At first, the milk is tested to check its quality. Next, the milk is heated to make it safe. After that, ingredients are added to make the milk more solid.

- 3 Review the description of the process of making honey and find six time expressions.

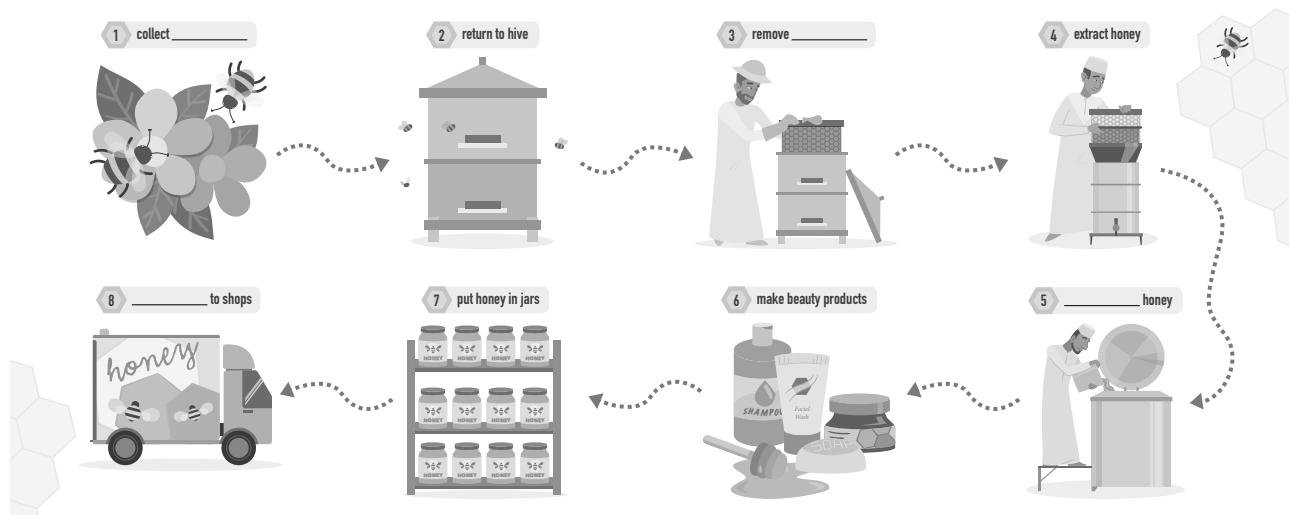

The process of honey production

The diagram shows the different stages of the process of making honey. The diagram also illustrates the equipment used in this process. Overall, there are eight stages shown on the diagram. The first two stages involve bees. After that, the honey producers are responsible.

At first, the bees collect the nectar from the flowers and take it to the hive. In the hive, the bees use the nectar to produce honeycomb. Next, the honey

producers remove the honeycomb frames from the hives. These frames are taken to the honey factory and the honey is extracted. Following this, the honey is placed in a filter machine to remove solid bits.

At this stage, some honey is sent to different factories to be used in products such as beauty products. Before the rest of the honey can be sold, it is packaged in jars. Finally, these jars of honey are transported to the shops for customers to buy.

6 These four sentences continue the description of making cheese. Number them in the correct order.

- a People then buy the cheese and take it home to enjoy with their families.
- b Finally, the cheese is sent to markets and shops.
- c Before the cheese goes to the shops, these blocks are packaged in the factory.
- d Next, the solid part is pressed into blocks.

7 Complete the advice in the Writing Skill box with phrases a to g below. Then check your answers on Student Book p72.

- a ... changes if you need to.
- b ... an essay or report.
- c ... spelling, grammar and the order of ideas.
- d ... in each paragraph.
- e ... the pictures to help you write your plan.
- f ... through your work.
- g ... the key words you will use.

8 Look at the diagram below illustrating how olive oil is made and do the following:

- Review the advice in the Writing Skill box.
- Check the meaning of the key words.
- Write a plan for your description.
- Review the passive tense.

9 Write at least 150 words describing how olive oil is made. Make sure that you use:

- at least four time expressions
- the passive tense.

The mystery of Shakespeare's identity

Did William Shakespeare really exist? If so, did he really write all his plays himself? These (1) (seem) like strange questions to ask about one of the greatest writers in history. However, some people believe that one man (2) (not write) so many plays and poems. They argue that this was impossible, and say that he (3) (have) help from other writers. There are also people who believe that the man named William Shakespeare, who lived in Stratford-upon-Avon, was not Shakespeare the writer because they believe he had never been abroad. Therefore, he (4) (know) about the places and people described in Shakespeare's plays. Consequently, they believe that the real author (5) (be) an aristocrat who had travelled widely. Most experts do not agree, but in universities all over the world, academics are doing more research into Shakespeare's life. It (6) (take) many years to solve the mystery of his 'lost years' and how he became the world's most famous writer. On the other hand, they (7) never (find out) the truth.

The mysterious disappearance of Dr Gachet

Vincent van Gogh's portrait of his friend Dr Gachet is one of the world's most important works of art. However, the portrait disappeared over 20 years ago and has not been seen since.

Many people still feared that the portrait had been destroyed, as Saito had wanted. Others wanted to know how such an important work of art could end up in the hands of a businessman instead of an art gallery.

1

In 1990, van Gogh's portrait of Dr Gachet was sold by Christie's auction house in New York, for \$75 million. It was the most expensive painting ever sold at auction and was bought by Ryoei Saito, a very wealthy Japanese businessman who immediately shipped it to a secret destination in Tokyo. Saito spent a few hours admiring his new painting, then he locked it away in a climate-controlled room. Saito later began having serious financial problems, but he refused to sell the painting. He even said that he wanted the painting to be destroyed after his death! The art world was deeply shocked. Saito died six years later, in 1996.

2

Nobody seems to know what happened to the portrait of Dr Gachet after Saito's death. It might have been inherited by Saito's company, or by his family. Or it might have been kept by the bank he owed money to. According to representatives of Saito's company, the portrait was safe, but they refused to say where it was.

3

To answer this question, we have to go back to the time of van Gogh's death, in 1890. Vincent's work was first inherited by his brother, Theo, and then by Theo's wife, Johanna. A few years later, Johanna sold the portrait of Dr Gachet to a Dutch art collector. The portrait changed hands four more times before finding a home in an art gallery in Frankfurt. In 1933, it was hidden in a secret room inside the museum, but was found in 1937. It became part of a German minister's private art collection, but it was later sold to a Dutch banker called Siegfried Kramarsky. During World War II, Kramarsky escaped to New York, taking the painting with him.

4

In 1984, the Kramarsky family lent the portrait of Dr Gachet to the Metropolitan Museum of Art. It was the first time the painting had been seen in public – and it was to be the last.

When the Kramarskys sold the painting in 1990, they could not have imagined it would

vanish. However, there is hope that Saito did not destroy the painting. In 2006, a newspaper article claimed that an Austrian banker, called Wolfgang Flöttl, had borrowed \$240 million to buy several masterpieces, including van Gogh's Dr Gachet. Amazingly, Flöttl paid back the money within a year. According to the newspaper, Flöttl must have sold the portrait to raise the money. So, who owns the painting now? Did Flöttl sell it to the bank, or to a private collector? Or, is the portrait of Dr Gachet still hidden somewhere in Tokyo?

 - b** Two students were taken to hospital collapsing during the show.

10 Choose one of the situations in Exercise 9. Write a short apology to put on the school website. Give an explanation and/or more details of what happened. Use Exercise 8 to help you.

Listening

1 Read the How to... box. Put the steps (a–e) in the correct order to complete the useful strategies.

HOW TO ...

identify the main idea

Listen to a text or conversation and choose the correct option.

- **a** Look carefully at the meaning of each option – remember the topic words may be similar in each case.
- **b** The second time, check your answers.
- **c** Read the task instruction and the options.
- **d** The first time you listen, choose the correct answer.
- **e** Identify the overall topic if it is mentioned.

Important! Concentrate on matching the idea of the text with one option if the topic words are similar.

2 Check your answers to Exercise 1 at the bottom of the page. Now use the strategy to do these activities.

1 6.3 You will hear someone talk about her job. Listen and choose the correct option (a–c).

- a** The woman is a history teacher.
- b** The woman works in a museum.

Instructions

1 Read the instructions. Which shape do the instructions tell you how to draw? Complete the title for the instructions.

How to draw a

Drawing shapes is a skill which can easily be learned. Use plain paper and take something to draw with. A pencil is best because you can erase any mistakes you make. On the paper, draw a square. Use a ruler because the lines should be straight. Then, draw another square. This square should be the same size, but it must be higher and a little to the right.

Then, look at the two squares carefully. Find the top right corner of both squares, and draw a line to connect these corners. Then, do the same for the top left corners. Draw these shorter lines by hand, or use a ruler to keep them straight. Then, connect the bottom left corners, and finally connect the bottom right corners.

To finish your cube, you can erase some of the lines inside the shape. This will make the cube look solid.

- 2 Cover the shapes. Then read the instructions again and draw the shape.
- 3 Put the words in the correct order to make questions. Write the questions in the Writing Skill box to complete the checklist. Then check your answers with Student Book p83.
 - 1 are / text / why / reading / this / they
 - 2 know / do / already / they / what
 - 3 they / what / not / do / know
 - 4 important / to / what / for / them / know / is
 - 5 clear / is / information / the

WRITING SKILL

Identifying the purpose

When writing, it is important to think why you are writing. Use the checklist below as a reminder.

- Who is the audience?
-
-
-
-
-

- 4 Answer the questions from the Writing Skills box about the instructions text.
- 5 Choose the correct option to complete the Writing Mechanics box. Then check your answers with Student Book p83.

WRITING MECHANICS

Using clear, direct language

When you give instructions, it is important to be clear.

- Keep the sentences long / short / complicated.
- Use imperatives / conditionals / the passive.

For example:

Write your name. / I think you should write your name.

We want you to turn the page. / Turn the page.

Repeat the process. / Repeating the process would be good.

- 6 Review the instructions and underline examples of each point from the Writing Mechanics box.
- 7 Rewrite the sentences on how to paint a tree to make the instructions clearer.
 - 1 So the first thing you should do is to get some paper and then you need to think about the colours to use.
.....
 - 2 You can go outside and look at different trees, or if you want, you can look on the internet.
.....
 - 3 You can look very closely to see how most of the trees have the same kind of structure.

Reading

1 Read the text about Louis Braille and answer the questions.

- 1 What happened to Louis Braille when he was three years old?
- 2 Who inspired Louis to invent his own system of reading and writing?
- 3 How old was Louis when he completed his invention?

Louis Braille

Louis Braille

Louis Braille was born in France, in 1809. He lived with his family near Coupvray, near Paris. His father ran a business making leather harness for horses.

(1) When he was three years old he was playing with a tool which made holes in leather. As he pressed down hard, the tool slipped and its sharp point went into his eye. (2) It became badly infected and the infection spread to his other eye. Louis became completely blind.

Louis was a very clever, creative child. When he was ten years old he won a place at the National Institute for Blind Youth in Paris, which was one of the first schools for blind children in the world. (3) They moved their fingers across the page to work out what the text said, but reading these letters was very slow. Louis became impatient to learn more and realised that blind people needed an alphabet which used the sense of touch.

When Louis was 12, a French army captain, Charles Barbier de la Serre, came to the school to present his own system of reading, called Sonography. It was based on phonetic symbols and used raised dots. (4) However, Louis was inspired by Barbier's system and soon realised how it could be improved.

(5) So Louis set to work and invented his own system, which was much simpler and had fewer raised dots. He also added symbols for writing music and doing maths.

By time Louis was 15 years old, he had developed the system we know today as Braille. However, his system of touch reading and writing was not widely accepted during his lifetime. (6) Today, Braille is the standard form of writing and reading for blind people all over the world. Louis Braille was probably one of the youngest inventors to have lived and his invention has improved the lives of millions.

2 Match the sentences (a–f) with the gaps (1–6).

- a It was a great idea and could have been used by the children if it hadn't been so complicated.
- b After his death in 1853, people began to appreciate the simplicity and efficiency of his reading and writing system.
- c As a small child, Louis loved spending time in his father's workshop, trying to use the tools.
- d Louis was taken to Paris for an appointment the next day with a well-known eye surgeon, but his eye could not be saved.

A big barbecue disaster!

Last Saturday morning, my friend Sonia came round to my house. It was such a lovely day that we sat outside in the garden. (1)..... chatting for a while, we had a great idea – we could have a barbecue in the garden! I went inside to ask my mum if it was all right (2)..... phoning my friends to invite them round. Quite a lot of them weren't in, so we left messages on their voice mail. In the afternoon, we went shopping for burgers, chicken, drinks and snacks. (3)..... checking for messages on our mobiles, we made a list of everyone who was coming to the party. My dad helped us get ready (4)..... setting up some lighting and music outside. When the guests arrived, Dad started cooking the burgers. When they were ready, we realised we didn't have any bread rolls to put them in! I shouldn't have gone shopping (5)..... first making a list! But that wasn't the only mistake I made. Halfway through the party, Sonia told me that we'd forgotten to invite her cousin Chris. I should have written the guest list (6)..... making any calls!

HOW TO ...

understand the organisation of a text

Complete the gaps in a text with given sentences. There is often one extra sentence.

- a Match each additional sentence with a gap in the text, based on the content.
- b Read the text quickly before you look at the additional sentences.
- c Check that the grammar fits logically with the additional sentence you matched.
- d Read the sentences before and after each gap carefully.

Important! Make sure the sentence you don't use doesn't fit any of the gaps.

2 Check your answers to Exercise 1 at the bottom of the page. Now use the strategy to do this activity.

Match the sentences (a–e) with the gaps (1–4). There is one extra sentence.

Dear Karen,

I'm really sorry you weren't invited to the barbecue yesterday. (1)..... We weren't very well organised and did a few silly things. I even forgot to get bread rolls for the burgers! (2)..... You would've enjoyed it, if you'd been there. (3)..... Mum says I can invite two or three friends round this evening to help us finish it. Would you like to come? (4)..... If the weather stays nice, we'll probably do another barbecue.

Lucy

PS I've sent you a text message as well.

- a I wanted to ask you, but I forgot to phone you.
- b We can go there together.
- c But in the end, it was still quite a good party.
- d However, we've got lots of food left.
- e Sonia and her brother, Ian, will be there too.

- d used to visit family in Florida.

A for and against essay

1 Read the first paragraph of the essay and complete the title.

Some education systems allow

 **What are arguments for and against? What is your opinion?**

¹Using technology in education is very common nowadays and many schools and colleges have computers and projectors in the classrooms. However, there is a lot of discussion on the topic of using mobile phone technology for learning. Some people argue that mobile phones are excellent tools for education, while others believe that phones are very distracting and prevent learning. This essay will explore both sides of the argument.

²On the one hand, people in favour of using mobile phones say that the phones are like mini-computers. They are very powerful tools and students can do many things with them, such as record presentations or do research. Furthermore, they say students should have learned how to concentrate and focus on learning by the time they are at high school.

³On the other hand, some people feel students may get distracted as their phones contain so much personal data. Students could find it difficult to concentrate, because they can look at photos, messages, videos and apps. Also, it is impossible for one teacher to control how twenty students use their phones. For example, students at the back of the class could be looking at something different from the lesson material.

⁴In conclusion, I believe the benefits of using phones in class are greater than the drawbacks. Many students in my grade would have loved to use mobile phones for learning from Grade 9 onwards. Teachers and students can make rules in order to control the use of the phones in lessons to make sure the phones help learning.

Stating purpose and reason

We use connectors of **purpose** to say

- *in order to* + infinitive

Animals should not suffer in order to achieve this.

- *so that* + verb

Many drugs were invented so that they could save lives.

We use **reason clauses** to give They are very similar to purpose clauses.

- *because* + clause

We use *because* when the reason is the

The clause usually comes after the main clause to give it more emphasis. There is no comma before *because*.

... an animal experiment may not give accurate results because their bodies are different.

- *as/since* + clause

We use *as* or *since* when the reason is These clauses often come at the beginning of the sentence. However, they are sometimes written after the main clause and after a comma.

As/Since animals' bodies are not the same as our own, an experiment on animals gives us the wrong result.

An animal experiment can give the wrong result, since/as their bodies are different.

Shoppers' paradise

Dubai is one of the seven states which form the United Arab Emirates. In recent years, it has become a top tourist destination. Its exotic beaches, stylish hotels and first-class services attract people from all over the world. But these days, Dubai is probably best known for its shopping. It has some of the biggest shopping malls in the world. It also has traditional bazaars, called souqs, which sell everything from food and spices to silk and gold. But what does Dubai have to offer its younger visitors? We asked two British teenagers to tell us about their experiences.

'I went on holiday to Dubai with my family. At first, we spent a lot of time on the beach and going sightseeing. We saw some really impressive buildings and even went on a camel ride, but it was just too hot! In the end, we decided to escape the heat and go to one of the big, air-conditioned malls. There were at least 300 stores inside, as well as coffee shops, restaurants, and entertainment centres. The shops were very stylish, but after a couple of hours my younger brother said that he was fed up with looking round the shops, so I took him to an entertainment centre which had flying spaceships, a soft play area, and arts and crafts. There were things for teenagers too. There was a 3D cinema, indoor roller-blading, and live performances. I went back there the next day with my dad and we had a brilliant time! I wish we had malls like that back in England!'

Kevin, Sheffield

'I loved the long, sandy beaches and sparkling, clear blue water. I could have stayed on the beach all day, but my parents wanted to look round the city. Although I didn't really want to go at first, I'm glad that I did! The city of Dubai is a really fascinating place. There is an amazing mix of buildings and huge, modern structures including the tallest building in the world! There are squares with enormous fountains, beautiful mosques, and glitzy hotels and office blocks – even the shopping malls are great to look at. We went to one mall, called Ibn Battuta Mall, which is built in six different styles: Andalusian, Iranian, Egyptian, Tunisian, Indian and Chinese. However, the best places for shopping, for me, were the souqs. They were colourful and lively, and the delicious smells of incense and spices filled the air.'

Writing: a formal letter

6 Read Tony's letter and answer the questions.

- 1 Who is he writing to?
- 2 What is he complaining about?
- 3 How many times did he have to complain?
- 4 What does he want the manager to do?

The Manager
 SuperTec Phones
 New Town

Dear Sir / Madam,
 I am writing to complain about the quality of the service in your shop.

Two weeks ago, I bought a smart phone from you. The shop assistant said that there were clear instructions on how to use it inside the box. (1)..... this assurance, when I got home, I saw that the instructions were in Chinese and German, and not in English. So, I went back to the shop and complained to customer services. They said they didn't have any instructions in English, but that I could come back to the shop any time and ask one of your specially-trained sales staff if I had any questions.

(2)..... this promise, I agreed to go home and try and work out how to use the phone by myself.

However, after several days I was still struggling with it, so I returned to customer services and asked them to help me. (3)..... the promise they had made earlier, there were no specially-trained sales staff available at that time.

The assistant told me somebody would be available within half an hour, if I was prepared to wait. (4)..... waiting for over an hour, there was no sign of anyone who could help me. I felt very annoyed and I went home.

A few days later, I went back to the shop and said that (5)..... the poor service I had received, I wanted to return the phone and have a refund. (6)..... of all the problems I have had, I was told that a refund was not possible, as there was nothing actually wrong with the phone. I am extremely dissatisfied and would like you to resolve this complaint as quickly as possible.

Yours faithfully,
 Tony Right

Young people and money – a report

Young people's preferred way of paying

Young people are important to a nation's economy. They are the customers of the future and, increasingly, they are important customers of the present. This is because young people today are richer than ever before. A recently released survey reveals key facts about young people and money. The following report describes the main findings.

Banks around the world know that young people are important to their business. The banks offer them debit and credit cards with good benefits. However, it seems young people prefer the old ways. The survey asked how young people preferred to pay. 65% said they preferred cash compared to only 30% who chose the debit card. Fewer than 10% said they preferred to use a credit card.

The source of young people's income

Young people have more money today than in previous generations and the survey asked where young people got this money from. 40% of young people said their parents gave them a weekly allowance to spend on whatever they liked. Only 10% of young people relied on gifts from family and friends, while slightly more said their money was from a part-time job. Just over a third said their spending money came from a combination of these sources.

To summarise, cash is popular now. However, it will be interesting to see if the survey results remain the same in the future with the increase of technology and the move towards a cash-free society. Also, although most young people rely on their parents now for money, many people predict this will change as young people start to have work experiences at a younger age.

WRITING MECHANICS

Reporting survey results

- Start by saying what the survey is about.

- 4 Find and underline similar phrases for reporting survey results in the report.
- 5 Choose the correct words for comparing and contrasting in the Writing Mechanics box. Then check your answers with Student Book p112.

WRITING MECHANICS

Comparing & contrasting

Look for similarities and differences when you describe survey results. Use words and phrases such as *compared to*, *like* and *while*. For example:

Compared to / Although boys, girls like to spend more money on clothes.

Despite / Like younger children, most teenagers said they spent their money on music.

However, / Although markets are not as popular as in the past, they are still part of our culture.

Despite / Compared to more people having credit cards nowadays, shops still prefer to accept cash.

Young people said they use social media every day.

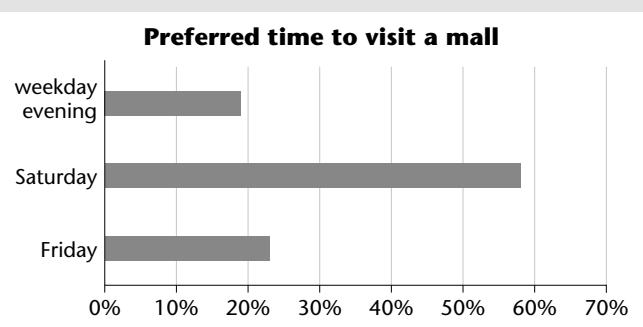

However, / Like most older people interviewed said they use it once a week.

Eating fast food was popular with most young people **compared to / while** only 56% of older participants said they enjoyed it.

- 6 Find and circle phrases for comparing and contrasting in the report.

- 7 In a survey for the magazine *UK Living*, 1,000 people were asked about their shopping habits. Review the charts and circle the interesting data.

- 8 Use the survey information to write a report. Write at least 200 words.

PLAN

Giants of the film industry

How much do you know about the two big movie capitals of the world: Hollywood and Bollywood? Read the text and complete the captions to the photos (c-f).

Hollywood today

After the big studios moved away in the 1990s, the town of Hollywood lost its shine. Even though most of the other industries involved in film-making, such as editing, special effects, *props* and lighting stayed in the town, the area started to become run-down. In recent years, however, there has been a lot of redevelopment. Many old, abandoned buildings have been *converted* into expensive apartments. The old studios and historic theatres have become the venues for big concerts and award ceremonies. One example is the Hollywood Hotel, which is now the Dolby Theatre and is where the Oscars ceremony is held every year. Hollywood is also home to lots of scriptwriters, composers, camera operators, acting coaches, fitness coaches, producers, make-up artists, costume designers, photographers and acting agents, as well as some of the best doctors, dentists, vets and hairdressers in the world.

Bollywood's history

Bollywood is India's answer to Hollywood. It is based in Mumbai and is one of the biggest centres of film production in the world. Unlike Hollywood, Bollywood is not an actual place but the name given to the Indian film industry during the 1970s, when Mumbai was known as Bombay. Like Hollywood, the Indian film industry has a long and fascinating history. The first Indian film was shown in a cinema in Mumbai in 1899. After that, many silent films were produced in the city. In the 1930s, films became sound movies, or 'talkies' and the first Indian talkie was a musical called *Alam Ara*. With the arrival of colour films in the 1950s, Indian films became more extravagant with even more amazing costumes and enormous sets. Most of the stories were based on local or traditional tales. Bollywood has also produced serious films and documentaries, some of which have won international film awards.

Bollywood today

Bollywood today makes twice as many films as Hollywood, producing around 800 films a year. About 14 million Indian people go to the cinema every day and massive film posters dominate the streets in every city. Bollywood actors work very hard and often have to shoot scenes for different films on the same day. The majority of films are made in Film City; a huge complex of studios and outdoor film sets, located west of Mumbai and set in 350 acres of beautiful green hills. It was built in 1978 by the Indian government to allow the Bollywood film industry to expand. In recent years, there has been a huge revival of the films which were popular in the 1950s: family films, comedy films, action films and musical extravaganzas. They are huge box office successes, showing at large multi-screen cinemas both in India and abroad.

f

More than Indians go to the cinema everyday, often to cinemas like this one.

Bollywood masala

Bollywood musicals follow a format known as *masala*. This is the name given to a mixture of Indian spices and it is certainly a recipe for success! *Masala* films always contain the same ingredients: lots of singing and dancing, including choreographed routines for up to 100 dancers, top film stars, lots of action, a simple story and a happy ending. With so much to fit in, a Bollywood film can be three or four hours long!

Sleep

1 Read the article about sleep and match the headings (a–f) with the sections (1–6).

- a Time for a siesta
- b Why do we dream?
- c Dream time
- d Human survival
- e Why animals sleep
- f Why do we sleep?

Sleep

1

We spend a third of our lives asleep, but researchers do not really understand why. Some sleep researchers believe that sleep keeps the brain functioning. Others say that sleep repairs damage from stress while we are awake, or that sleep helps you live longer. However, recent studies suggest other reasons why humans – and animals – need sleep.

2

For many years, experts have thought that sleep was bad for survival because sleeping animals are more at risk from predators and can't perform essential activities, such as eating, caring for family members, searching for food or looking out for danger. However, recent research has concluded that animals sleep in order to control their behaviour. A team of experts studied a wide range of animals and found that the time an animal spends sleeping depends on its needs. These include migration needs, the need to care for its young, and the need to avoid danger. For example, some animals can't migrate to a warmer climate in winter, so they hibernate. As a result, they conserve energy and need much less food. They also stay safe from predators by sleeping deep underground. On the other hand, migrating birds can fly for days without stopping or sleeping.

3

Humans need to conserve energy too. Our brains weigh only two per cent of total body weight, but they use 20 per cent of our energy while we are awake. Sleep helps us to survive in lots of other ways too. For early humans, sleep helped to keep them safe, because predators did not notice them when they were not moving about. Even now, we are much more likely to injure ourselves when we are tired, so having enough sleep is important for our safety. Like other mammals, humans can wake up quickly from sleep. The amazing thing about sleep is how the body and brain's metabolism can slow down while, at the same time, remaining responsive to their surroundings. A good example of this is that a parent will wake up if a baby makes even a small sound, but will sleep through a thunderstorm. When we are young, our high metabolic rate slows down a lot during sleep, but we sleep more deeply because there are people around to protect us.

Animals that don't migrate or hibernate can sleep peacefully ...

a When humans sleep, our metabolism slows down ...

2 Match the beginnings of the captions under the photos (a–d) with the endings (1–4) below.

- 1 ... because it helps their brains to develop.
- 2 ... when they are not in danger or don't need to take care of their young.
- 3 ... but we can still react to changes in the environment.
- 4 ... because it helps the brain to process more information.

It's good to have a nap during the day ...

4
 A good night's sleep improves our ability to learn much more than studying all night before an exam. A new study has shown that taking a nap also helps the brain process new information. It clears space for the brain to take in new experiences. The study, by the American Association for the Advancement of Science in San Diego, asked 39 young adults to perform several learning tasks. One group then took a 90-minute nap, while the other group stayed awake. Afterwards, both groups performed the tasks again. The nappers performed much better than the non-nappers, the researchers found.

3 Add one more sentence (1–4) to each caption.

- 1 We can wake up fast even in the middle of a dream.
- 2 It could even lead to better exam results.
- 3 Sleep is also important for animals' survival because it helps them to conserve energy.
- 4 They also sleep more deeply.

5
 After falling asleep, your muscles relax and you breathe more slowly. Then you go into a deep sleep and your eyes begin to move around quickly under your eyelids. During this rapid eye movement (REM) sleep, you dream. You may think you are performing physical actions, but your brain has frozen your muscles so that you actually lie still in bed. Thoughts and images flow into your mind, but they often seem strange and out of sequence.

6
 While you dream, your brain is sorting through all the experiences you have had while you were awake. Until now, it has stored them in temporary memory, but during REM sleep they are put into long-term memory. Babies need more REM sleep than adults. When a baby is born many of the connections between *neurons* (nerve cells) haven't formed yet. As babies learn, each new experience or ability creates new connections which are put into long-term memory during REM sleep.

The Staffordshire hoard

In 2009, a treasure hunter in Staffordshire, in the West Midlands of England, discovered an amazing hoard of ancient artefacts – even larger than the Sutton Hoo treasure! Terry Herbert had been crossing his friend’s field with an old metal detector when he came across a golden object lying on the ground. He began to dig, and within a few days had filled 244 bags with pieces of treasure. Archaeologists then excavated the land until a total of 500 objects were found. Archaeologists at the British Museum identified them as 1300 year-old Anglo-Saxon artefacts, which almost certainly belonged to a king. The gold and silver treasure includes armour, helmets, coins, sword handles and many fantastic jewels. According to experts, the jewels were probably from Sri Lanka, whereas the gold had probably come from Constantinople, now Istanbul, Turkey.

b

Tutankhamun's treasure

In 1922, the British archaeologist Howard Carter discovered a tomb full of treasures in the Valley of the Kings, on the banks of the River Nile. The ante-room, the first room to be discovered, was so full of wonderful treasures that it took three months to catalogue them! Then Carter opened the sealed doorway to the burial chamber. Inside, he discovered the sarcophagus of the Egyptian pharaoh, Tutankhamun, who had ruled between 1332 BCE and 1323 BCE. Tutankhamun had been buried with over 3,500 precious objects. These included his throne and his burial mask as well as furniture, household objects and many beautiful pieces of jewellery made of gold and precious stones. Many of these incredible artefacts are permanently housed in the Egyptian Museum in Cairo.

The Sutton Hoo treasure

In 1938, a local archaeologist, Basil Brown, started to excavate some strange mounds in Sutton Hoo, a small town in the east of England. For many years, people had told stories about huge amounts of gold lying under these mounds. As Brown and his team dug, they discovered the remains of a huge wooden ship containing a burial room. Inside the burial room, the archaeologists discovered some of the most amazing treasures ever found in Britain: shields, swords, armour, a helmet, cups, bowls, spoons and coins – all made of bronze, silver and gold and decorated with jewels. Their owner had clearly been a lord – or even a king from the 7th century CE. The collection is on permanent display in the British Museum in London.

The Bactrian treasure

In 1979, a group of archaeologists were working on a site in northern Afghanistan, when they came across six graves. The bodies were those of a woman and five men. They had obviously been very important, wealthy people: each had been buried with their most precious possessions including coins, medallions and crowns, as well as beautiful jewellery made of gold, turquoise and other precious stones. The archaeologists eventually unearthed a total of around 22,000 pieces of treasure. The collection is over 2,000 years old and dates back to a time when Afghanistan was part of the Bactrian Empire. The treasure first went on display in Kabul in 2003.

The Bulgarian Preslav treasure

In Spring 1978, some farmers in Kastana, Bulgaria were planting grape vines, when one of them found some large gold earrings which had been unearthed by the tractor. Within a short time, they had found many more pieces of jewellery including necklaces, bracelets and earrings. Excavations quickly began. Around 170 items of gold and bronze jewellery, silver coins and buttons, gold plates and other artefacts were found, all dating back to between the 3rd and the 7th centuries CE. Among the many wonderful treasures is the Preslav necklace, given by Tsar Petar I of Bulgaria to his bride, in 927 CE. The necklace is beautifully decorated with images of water birds, known to symbolise family happiness.

The history of the Paralympic Games

The first sporting event for athletes with a disability was a wheelchair archery competition which took place in London in July 1948, to coincide with the London Olympic Games. It was organised by Dr Guttman, a German specialist in spinal injuries. Dr Guttman had opened a centre at the Stoke Mandeville Hospital in Great Britain for people injured during World War II. The competitors were all patients from the hospital whose rehabilitation treatment involved sporting activities. Four years later, the second Stoke Mandeville Games took place with war veterans from Holland competing against the English wheelchair athletes.

Eight years later, the Stoke Mandeville Games had grown so large that an international organisation was created and the first Paralympic Games for athletes with a physical impairment were held in Rome, in the summer of 1960. Four hundred athletes from 23 countries took part. Athletes with visual disabilities or amputations were unable to compete in the Paralympics until 1976, and events in which paraplegics and people with cerebral palsy could compete were not included until 1980. Today's games, however, are open to athletes with mental, physical, sensory and motor skill disabilities.

Jonnie Peacock uses special carbon fibre blades to compete in international events.

Goalball players use blindfolds to ensure fair play.

The modern Paralympic Games

The Paralympic Games take place every four years, immediately after the Olympics. Since 1992, they have also been held in the same cities and stadia. The most recent Paralympics were the 14th Paralympic Games, held in London in August 2012. There was a spectacular opening ceremony where over 4 200 athletes from 165 different countries paraded around the stadium holding up their national flags. Four days earlier, Paralympic torches had been lit in London, Belfast, Cardiff and Edinburgh. The four flames were taken to Stoke Mandeville, where they were joined together to form the Paralympic torch before being taken to the Olympic Stadium.

Special equipment is essential for competing in the Paralympic sport of *boccia*.

Paralympic sports

At the summer Games, athletes compete in 28 sports from ten sporting disciplines: archery, equestrian events, fencing, football, judo, powerlifting, shooting, swimming, table tennis and track cycling. Most of the sports are the same as those in the Olympics. However, special Paralympic sports have been added to the games over the years. The first new sport, goalball, was introduced in 1980. It involves teams of three blind or partially-sighted players who try to score by throwing a ball into the opposing team's goal. To make sure that the competition is fair, all players have to wear a blindfold. Another event is *boccia*, which is played by athletes with motor skill disabilities, such as cerebral palsy. The aim is to throw six balls as close to a target ball as possible. According to Norwegian paralympian, Roger Aandalan, *boccia* is not as easy as it sounds because the athletes have to control their own movements as well as aim at the target ball.

Sports equipment

Many athletes need to use specially-designed wheelchairs and other equipment in order to compete in their chosen events. For instance, visually-impaired athletes often use a hearing device which tells them when to jump or throw the javelin, while athletic wheelchairs are extremely lightweight and adapted to the needs of each sport. In track and field events, amputees can use prosthetics. The latest, technologically-designed prosthetic legs are made of carbon fibre blades and are so good that sprinter, Oscar Pistorius, was able to compete against able-bodied athletes to become the world record holder for the 100, 200 and 400 metres. In fact, today's technology is advancing so rapidly that designers have already been working on new kinds of equipment. An exhibition at Imperial College, London in 2012 included sports shirts made of a special fabric that will allow goalball players to distinguish team members by touch. There was also a helmet which will allow competitors to transmit their thoughts to their equipment in order to control its movement. It will be interesting to see what designers will invent for the next Paralympics.

The London Aquatics Centre was the venue for the Paralympic swimming events in 2012. It was designed by Anglo-Iraqi architect Zaha Hadid and features a roof shaped like a wave.

Archery was the first sports competition organised for people with disabilities.

Marco Polo

- 1 Who was Marco Polo? Read the text and choose the best answer (a, b or c).
 - a An Italian merchant from the 12th century CE who travelled to India and Iran.
 - b An Italian explorer who lived with the Chinese royal family for many years.
 - c An Italian merchant and explorer from the 13th century CE who travelled widely in Asia.

- 2 Read about Marco Polo's journey and look at his route on the map. Write the cities and islands in the correct places on the map.

Acre Constantinople Hormuz Jerusalem Tabriz
Shangdu Sumatra Venice

Marco Polo was a young merchant in Venice back in the 13th century CE. In 1271, he left Italy with his father, Niccolò, and his uncle, Maffeo, and travelled across more than 12 000 kilometres to the old Mongolian city of Shangdu. Three years later, Marco finally entered the shining marble palace of the Kublai Khan about 300 kilometres northwest of Beijing. Very few Europeans had journeyed so deep into Asia before, or had spent so long travelling.

Marco Polo wrote about his experiences in his book, *Description of the world*, but when the Venetians read about Marco's wonderful adventures, he was not taken seriously. The idea that the world's largest and richest cities were not found in Europe was a huge shock to them. Marco also wrote about things which Europeans had never seen, but the animals and places he described were too strange. People did not believe him. Even today, there are still people who think he invented the whole story.

So, how much of Marco Polo's book is true? Some people argue that Marco went no further than Constantinople or the Black Sea, and that his more fantastic stories were stolen from the Arabs and

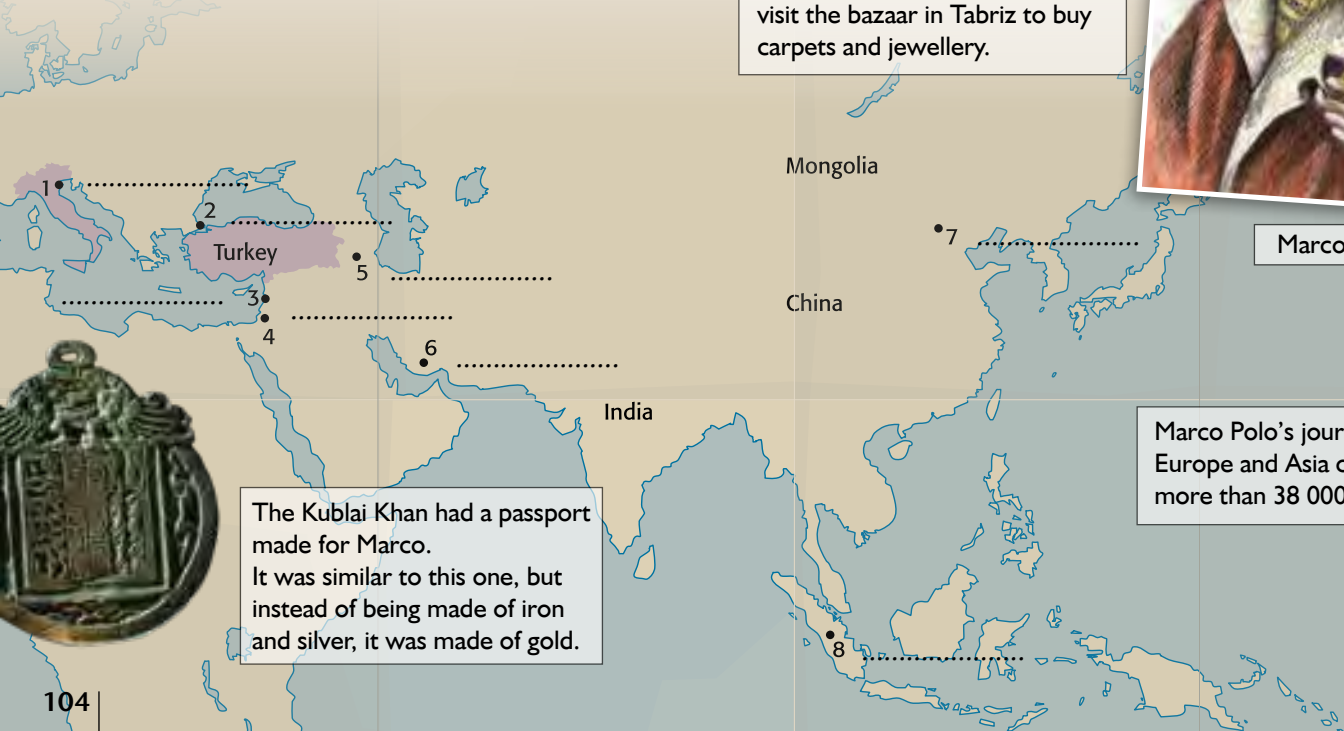

Persians he met there. However, academics who have studied his work believe that most of it is true, but say that Marco's work was changed by the scribes who copied and translated it. About 150 different versions of Marco Polo's text are known to exist. The version which is probably closest to Marco's original belongs to the Bibliothèque Nationale in Paris.

European and Arab traders still visit the bazaar in Tabriz to buy carpets and jewellery.

Marco Polo

The Kublai Khan had a passport made for Marco. It was similar to this one, but instead of being made of iron and silver, it was made of gold.

Marco Polo's journey across Europe and Asia covered more than 38 000 kilometres.

Marco left Venice, aged 17. They sailed first to Constantinople (now Istanbul), in Turkey, where Marco was impressed by the fantastic bazaars and wrote about the fine carpets and silk. From there, the Polos sailed to Acre, then travelled to Jerusalem and then (on to) Tabriz, in the northwest corner of Persia. The city used to be popular with Italian merchants who wanted to buy goods from strange lands, especially the rubies and sapphires from India and Sri Lanka. Today, it is a modern city of concrete buildings, except for the enormous bazaar, with its massive brick walls and elegant arches.

After travelling across Persia, the Polos reached the port of Hormuz. They decided not to travel by sea to India and China because they did not trust the Persian traders' ships. 'Their ships are very bad and many of them are lost,' wrote Marco. Instead, they travelled along the Silk Road, over the Central Asian mountain range. Marco described the mountains as 'the highest place in the world'. He also recorded seeing huge,

wild sheep with enormous horns, which became known as Marco Polo sheep.

The three men then had to cross the Gobi Desert before reaching their destination: the palace of the Kublai Khan. Niccolò and Maffeo had been there nine years before. The Polos stayed at the palace and Marco became the Kublai's advisor and ambassador. He travelled the four corners of the Mongolian Empire and recorded all the fascinating things he saw: the local customs and events, clothes, ideas and wildlife. In southern China he met people whose sharpened teeth were covered in gold and whose bodies were decorated with tattoos.

After 17 years, the Kublai Khan finally allowed the Polos to leave. They travelled to Persia with a Mongol princess. Carrying gold and rubies, they sailed from the Chinese coast, via Sumatra and Sri Lanka. After delivering the princess to her future husband, they eventually reached Venice 24 years after they had left.

In Marco Polo's day, the mountains of central Asia were very difficult to cross.

Monsters of legend

There are many legendary monsters around the world. For centuries, people have told stories of strange mountain beasts and of mysterious creatures living in lakes. People everywhere, it seems, love a good monster mystery.

Bigfoot

One autumn day in 1967, deep in the mountains of northern California, two men saw a huge, hairy beast sitting by a stream. The creature then walked off into the forest. Luckily, the men managed to film the beast on their video camera. They also made plaster casts of the creature's enormous footprints, which they found in the mud. In California, this monster is known as *Bigfoot*. In Canada it's called *Sasquatch*, which comes from an Indian word that means *wild people*.

But does *Bigfoot* really exist? Some scientists say that the film and footprints must be fakes. Others believe they are genuine. But if the story of *Bigfoot* were true, surely someone would have found the body or the skeleton of one by now? They might even have caught a live one!

The Yeti

For centuries, people in Tibet and Nepal have been telling tales about a huge, hairy, smelly, ape-like creature that lives on the slopes of the Himalaya mountains. The beast has many names, including the *Abominable snowman* and the *Yeti*, which means 'big eater'. During the 20th century there was a lot of interest in the *Yeti*. British and American explorers and mountaineers reported seeing a large, human-like creature

wearing no clothes. They photographed strange, enormous footprints in the snow and even brought back hair samples.

In recent years, however, DNA tests have shown that the hair was from different wild animals that live in mountains. Scientists also suggest that the *Yeti* might actually be a threatened species of Himalayan brown bear, which can walk upright.

These footprints may have been made by a Himalayan bear. Or do they belong to the *Yeti*?

The sign on this tree might persuade more people to stop and visit *Bigfoot country*.

The Loch Ness monster

The Loch Ness monster is probably the most famous lake monster in the world. People have reported seeing the marine reptile for more than 1 300 years. They say it has a long neck and spikes on its back, like a dragon. In 1934, a man claimed that he had taken a photo of Nessie but, in 1991, he told reporters that it was a clever hoax. The photo really shows a model which he had stuck onto a toy submarine.

Over the years, researchers have searched the lake using modern equipment, such as underwater cameras and ultra-sonic sensors. Although they have never found Nessie, they have learned a lot about the lake. They believe that there would have to be many more fish in the water to feed large predators. Also, the lake would be too cold for any large reptile to survive. There is a theory that the Loch Ness monster could actually be a huge fish, called a sturgeon. The sturgeon has a long nose and a spiky back and can grow to 20 feet long. It lives in the North Sea, but one may have swum into the lake and been seen before swimming away again.

Mokele-Mbembe

For years, people have reported seeing a strange beast, known as *Mokele-Mbembe*, in the swampy lakes and jungles of Central Africa. If it exists, this creature could be the last living dinosaur on Earth. However, descriptions vary. It may look like a brontosaurus but, in other parts of the Congo, native pygmies say it looks similar to a huge rhinoceros. There have been many expeditions into the dangerous lakes and swamps to find *Mokele-Mbembe* but so far there is no proof that the beast exists at all.

2 Test your knowledge. Write the names of the monsters.

- 1 These monsters are covered in hair.
- 2 This beast was captured on film.
- 3 This animal could be a dinosaur.
- 4 These beasts are able to walk like humans.
- 5 Advanced technology has been used in the search for this beast.
- 6 If it existed, this beast would die of hunger.
- 7 People have taken photographs of its footprints.
- 8 This creature might actually live somewhere else.

- Answers:**
 1 d 2 a 3 b 4 c
 2 1 Bigfoot and the Yeti
 2 Bigfoot
 3 Mokele-Mbenbe
 4 Bigfoot and the Yeti
 5 The Loch Ness monster
 6 The Loch Ness monster

2 Now it’s your turn to reflect and speculate. Think about each question. You can make notes and share them with your class.

How much has each job changed over the past 50 years?
How might the jobs change in the future?

The shopkeeper

Souqs are at the heart of traditional Omani shopping. These covered markets have a long history in in the Middle East and North Africa. For more than 2,500 years, shopkeepers have been selling their goods from tiny shop fronts crowded together in narrow alleys. Muttrah Souq in Muscat is famous with locals and tourists alike, and dates back more than 200 years. Omani shopkeepers sell many local items, such as incense and frankincense, spices, sweets, silver jewellery and traditional cloth. These goods are piled high in the shops, making the most of the small interiors. The shopkeepers chat and drink tea with each other, waiting for customers. Then, the bargaining begins as, unlike in many western markets, prices are not fixed.

The teacher

Education in Oman has developed rapidly over the past few decades. 50 years ago, only three official schools existed in the country. Now there are well over 1,000 public schools and, at the time of writing, in 2019, exactly 603,797 students attend these, though this number is increasing all the time. More than 56,000 teachers work hard every day to provide these students with a first-class education. This means that teachers, just like their students, never stop learning. They are involved in training and development to make sure their own skills and knowledge stay up-to-date in our ever-changing world.

The honey producer

Honey is extremely important in Oman and neighbouring countries, such as the Yemen. Not only is honey delicious, but it is also therapeutic – it can be used for medicinal and beauty purposes. Traditional beekeepers work hard to maintain honey-producing traditions in Oman. Many of these honey producers live in the lower parts of the Hajar Mountains. They keep their bees in hollow palm tree trunks, though some now also use more modern wooden hives. It is estimated that approximately 5,000 beekeepers are responsible for more than 100,000 beehives in Oman. These workers produce more than 600 tonnes of honey and earn Oman over OMR15 million in exports. In Oman, people go to shops, markets and malls to buy their honey. Sidr honey is one of the most expensive and can sell for OMR160 per kilo.

The hat maker

The kuma, an intricately embroidered cap worn by Omani men, is a true cultural symbol of Oman. Also known as the taqya or kufya, these hand-stitched hats have unique designs which require many hours of skilled and patient work. Traditionally, women made the hats for family members; they decided on the colour and the design of each cap depending on who they were making it for. These skills were passed down through the generations. Nowadays, the cost of a hand-stitched cap can be high as the production can take more than 150 hours. Hats for everyday-wear are sometimes produced abroad, with designs being sent to India or the Philippines. These hats are machine-made and, therefore, cheaper. However, many hand-stitched caps are still made in Oman by local women and are valued highly.

The fisherman

Fish has always been a central part of the Omani diet, and it is no surprise when looking at a map of the country. Coastline stretches for 3,165 kilometres, giving many opportunities for smaller and larger fishing boats to push out to sea for their daily or twice-daily catch. Approximately 50,000 people earn their living in the fishing industry in Oman, with many of these working in the traditional fishing sector. These fishermen make use of small boats and techniques which have been used for centuries. The fishermen are aware of the importance of the environment and what they can do to take care of it.

Early forms of currency

Many people believe that ancient civilisations exchanged food, such as wheat and ⁽¹⁾ for other food and services. However, this would not have been possible because different food was harvested at different times of the year. If a fruit farmer wanted to exchange his produce for wheat, his fruit would have gone bad before he had the chance to trade. As a result, people traded using items that did not go bad and that were highly valued. These early forms of currency included gold, silver, copper and salt. In Africa, cowrie shells and ivory ⁽²⁾ were highly valued. There is evidence that the Early Egyptians used gold bars as far back as 4,000 BCE.

Cowrie shells, like these from Myanmar, are still a form of currency in some *tribal* cultures.

Shekels were the first ever unit of currency and were introduced by the Babylonians in Ancient Egypt. These coins were made from ⁽³⁾, bronze or copper. A shekel was both a unit of currency and a weight. One shekel was equivalent to a specific weight of barley. People could ⁽⁴⁾ barley for shekels and then trade their shekels for other goods from neighbouring city states.

The first stamped coins were made in Ancient Greece around 700 BCE. They were made of a mixture of gold and silver and other ⁽⁵⁾, called electrum or white gold. The coins, which were produced by the government, were stamped with an image of a turtle, to prove that they were authentic. Although gold and silver coins were originally of equal value, ⁽⁶⁾ eventually became more valuable than any other metal.

Ancient Babylonian coins, dated to 164 BCE. The Greek characters on the coin read: Antiochus IV Tetradrachm King of Babylon.

The old and the new. The futuristic Lloyds Bank building stands next to traditional Leadenhall Market. Both are symbols of the City of London's wealth and history.

Money and banks today

Q: 1.....
A: The idea of 'buy now, pay later' was introduced in Italy at the end of the Middle Ages. Trade had increased across Europe, and the Italians, who traded in fine cloth, wanted to sell their goods in large quantities and then ship them to their buyers. However, buyers were not happy to pay traders large sums of money before they had received the goods. The solution was to allow the buyers they trusted to pay for the goods later on, when they received them. The buyer had to sign a piece of paper, called a bill of exchange, where they promised to pay the full amount on a date in the future.

Q: 2.....
A: This happened about the same time as the introduction of the bill of exchange. The richest traders or merchants had started lending money to farmers and other, less wealthy, traders. They became known as 'merchant bankers'. Then, these early bankers started accepting bills of exchange. They gave the traders real money (coins) in exchange for their bills. However, they never gave the traders money to the full value of the bill, but always kept a certain amount, which is how the bankers made a profit.

Q: 3.....
A: Paper money first appeared in Britain in the 17th century CE. At that time, traders and other rich people stored their wealth (which would have been in the form of gold and silver) in a private vault belonging to a goldsmith. In exchange, the goldsmith charged a fee and gave them a paper receipt, showing the value of the gold and silver in the vault. With time, these receipts became accepted as a form of money. The goldsmiths also started lending money to traders. But instead of giving the traders gold, they gave them paper notes which could be changed into gold and silver at the merchant banks.

Q: 4.....
A: It began with the goldsmiths, who began lending sums of money that were higher than the value of the gold in their vaults. The system worked because people trusted them. If people had lost confidence in the goldsmiths, and had all gone to get their gold and silver out at the same time, the goldsmiths would have gone bankrupt. Many of today's big London banks started as goldsmith banks. Modern banking is quite complicated, but the basic idea that banks lend more money than they actually possess is still the same.

- Watch the first part of the film and choose the correct answer (a, b or c) for each question.

- What is the aim of the project?
 - To teach the orangutans English.
 - To understand how orangutans behave in captivity.
 - To understand more about orangutan mental ability.
- What is Inda learning?
 - How to use a computer.
 - A vocabulary of different symbols.
 - To communicate with visitors.
- What can Inda do?
 - She can make sentences with symbols.
 - She can draw symbols of food.
 - She can find objects.
- Read the sentences 1–3 below. Write words from the word list in the gaps.
 - Orangutans are highly developed p.....s.
 - Apes in captivity need a s..... physical and mental environment.
 - The language programme is a v..... activity for the orangutans.

5 Check your answers with a partner's.

PART THREE: In Mexico

6 Watch the third part of the clip and answer the questions.

- 1 Why does Roubik want data from Mexico?
- 2 What do the Mexican beekeepers tell him?
 - a Everything about the bees is the same.
 - b The African bees have caused small changes.
 - c The African bees have caused big changes.
- 3 After the African bees had arrived, how long did it take for the native bees to disappear?

Watch again and check your answers.

7 Watch the whole clip and answer these questions.

- 1 Are African bees only a problem in Panama and Mexico?
- 2 What is happening to the native bees?
- 3 What is the solution?

After you watch

8 Work with a partner and answer these questions.

- 1 Do you find bees in your country?
- 2 What other pollinating insects are there?
- 3 Are bees dying out, or is the population healthy?

Summary

In China, the technique of making silk fabric from the cocoons of moths was kept secret for over 2500 years. Then other countries learned how to produce silk. In the Vietnamese town of Vong Nguyet, village people keep and feed the caterpillars and collect the cocoons. The silk fibres from the cocoons are made into thread. Then silk cloth is made by weaving the threads.

Exercises

Before you watch

1 Read the summary and discuss the questions.

- 1 Which country did silk come from originally?
- 2 Is silk a natural or an artificial fabric?
- 3 What are three stages in the life cycle of a moth? Use words from the word list.
- 4 Do you own anything which is made from silk?

While you watch

PART ONE: The silkworms

2 Watch the first part of the clip and choose the correct answer (a, b or c) for each question.

- 1 Chinese royal families used to think that silk was worth more than:
 - a gold.
 - b diamonds.
 - c water.
- 2 How long do the silkworm caterpillars live for?
 - a Three days.
 - b Three weeks.
 - c Three months.
- 3 How long does it take a caterpillar to complete a cocoon?
 - a Three hours.
 - b Three days.
 - c Three weeks.

3 Read the sentences 1–3 below, and complete them.

- 1 The caterpillars eat only m.....

- 2 A silk f..... comes out of the caterpillar's mouth.
- 3 The farmers don't allow the caterpillar to become an a..... moth.

Watch again and check your answers.

PART TWO: Making the silk

4 Watch the second part of the clip and choose the correct answer (a, b or c) for each question.

- 1 What is the first step in making the silk?
 - a Find a single thread.
 - b Heat the cocoons.
 - c Break the cocoons.
- 2 What are the modern spinning machines like?
 - a They give higher quality thread, but are slower.
 - b They give lower quality thread, but are faster.
 - c They give higher quality thread and are faster.
- 3 How much silk material can be made in two and a half hours?
 - a One metre.
 - b Two metres.
 - c Ten metres.

5 Read the sentences 1–3 below, and complete them.

- 1 When the cocoons are heated, the silk becomes l.....
- 2 Silk cloth is made on machines called l.....s.
- 3 The process of w..... the silk cloth is very slow.

Summary

The school and farmers of Spirit Lake, Iowa, USA are installing wind turbines for their own electricity and to sell. The land is flat and the wind often blows in this area, so they save a lot of energy in this way, as well as teaching their children important lessons about the environment.

Exercises

Before you watch

1 Read the summary and discuss the questions.

- 1 What sources of energy are there where you live? How is the electricity you use made?
- 2 What ways do you know of producing electricity? Which are good for the environment, and which are not so good?

While you watch

PART ONE: Spirit Lake school

2 Watch the first part of the clip and answer the questions.

- 1 How much money have the wind turbines saved the school district?
- 2 What is the money saved the same as, according to the superintendent?
- 3 How strong a wind could the turbine stand up to?
 - a 30 miles per hour
 - b 130 miles per hour
 - c 300 miles per hour
- 4 What does the school do with the extra energy it produces?

Watch again and check your answers.

PART TWO: The farmers

3 Watch the second part of the clip and answer the questions.

- 1 How many farmers have allowed energy companies to build wind turbines next to their fields?
- 2 How much will Charles Goodman make a year from the electricity he sells?
- 3 How many wind turbines are there in this part of Iowa?

4 Check your answers with a partner's.

PART THREE: The physics teacher

5 Watch the third part of the clip and answer the questions.

- 1 What is Jan Bolluyt doing when we first see him?
- 2 Why does he say the wind turbines are positive for his students?

The island of Madagascar is renowned for its distinctive wildlife, but some scientists visit the island for other reasons. One group is investigating the island's smells and tastes. They are looking for new essences in plants and flowers. Essences can be used in perfumes, fruit juices and many other things we buy in shops.

Exercises

Before you watch

1 Read the summary and discuss the questions.

- 1 What is Madagascar famous for?
- 2 Where are essences found?
- 3 How are essences used?

While you watch

PART ONE: Looking for the essences

2 Watch the first part of the film and choose the correct answer (a, b or c) for each question.

- 1 Where exactly do the scientists go to look for new flowers?
 - a To the river.
 - b Along a forest path.
 - c The tops of the trees.
- 2 What happens in the laboratory?
 - a The scientists recreate the scents.
 - b The scientists store the flowers.
 - c The scientists analyse the essences.
- 3 Why is Professor Kaiser happy?
 - a Because he found a new flower on the Tampolo River.
 - b Because he's had a great experience in Madagascar.
 - c Because he has recreated a very similar scent to the one he found.

3 Read the sentences 1–3 below, and complete them.

- 1 Vanilla and jasmine are two flower s.....s.
- 2 The scientists get to the treetops by b..... .
- 3 The scents are used in a v..... of products.
