Praise be to Allah and Peace be upon His Messenger, Mohammed

Education is key for personal development, and it provides a wealth of opportunities in life. The commitment and efforts we put into education are some of the most fundamental investments we can make towards securing the future wellbeing of Oman and its citizens.

Our education system has been the bedrock of our development. It has provided this generation and those before it with the skills and knowledge that have driven the country's growth and, with it, our prosperity. But to meet our high aspirations as expressed in Oman's Vision 2040 amidst an increasingly competitive global environment, we cannot stand still.

To compete with the best in the world, our education system must develop young Omanis who are knowledgeable, think critically and creatively, have leadership skills and are able to communicate effectively in English with the rest of the world. Just as importantly, our students must be instilled with values, ethics and a sense of citizenship that will empower them to make the right choices for themselves, their families and the country.

Given Oman's historical and geographical profile, mastering English as a second language is an absolute necessity for all our students. It is the language of international communication and is also the main language for studying other subjects all over the world. Therefore, the Ministry took the decision to adopt and customise an international series called 'Team Together' that is benchmarked to the Global Scale of English (GSE) and the Common European Framework of Reference for Languages (CEFR), both of which are internationally recognised standards for describing language ability.

This series is based on the most cutting-edge research on teaching and learning. It will embed and develop Future Skills such as critical and creative thinking, as well as encourage holistic, well-rounded personal growth. This series will prepare our children to meet the challenges of a pluralistic society that welcomes diversity, a knowledge-based job market that is constantly evolving, and economic globalisation.

Finally, I hope that you find this book useful and enjoyable, and use it in your everyday lives, as this will enable us all to contribute to the success of our beloved country – the Sultanate of Oman – as led by the inspiration and wisdom of His Majesty, Sultan Haitham Bin Tarik.

I would like to take this opportunity to wish you every success in life.

Dr. Madiha bint Ahmed Al-Shaibani

Minister of Education

Most children go to school, but not all schools are the same!

In Bangladesh, there are sometimes floods. So some children study at school on a boat. Wow!

In Indonesia, this school teaches children using examples from nature. It's fun!

Some schools have an outdoor lesson once a week at a school called Forest School. These children in Britain are looking at leaves. What do you think they can find?

In the USA, this school never uses books or paper. All the children use computers for their lessons every day.

At some schools, children sleep at school on weekdays, and go home at the weekend or only for holidays! This is called a boarding school.

Welcome to Our School

Today we want to make a video about our school. The video is for our friends in Brazil. We want to show them the science lab, our classroom and the school garden.

Welcome to the science lab. We have Science lessons on Tuesdays and Thursdays at nine o'clock. We sometimes learn about plants and animals in Science lessons.

This is our classroom. We have Arabic lessons every day at quarter past eleven. After Arabic lessons, we have a break.

This is the school garden. We grow vegetables and we water the plants every day after school. The school garden is my favourite place.

An illustration of a school garden. In the foreground, a girl in a red dress and white headscarf holds a black microphone, looking towards a bird. A speech bubble from her says, "This bird wants to help us. What a kind bird!". To her left, another girl in a red dress and white headscarf is crouching, tending to plants. A green watering can sits on the ground near her, with two small brown birds nearby. In the background, a boy in a white shirt and green cap is also working in the garden. A large black camera is visible in the bottom right foreground, held by someone. The garden is filled with green plants and trees, with a school building visible in the background.

This bird wants to help us. What a kind bird!

We show the video to our friends in Brazil. They like it a lot.
They want to make a video, too. They want to make a video about
their school for us!

We love school!

Hippo's Kite

Hippo's kite can fly high. But Bird always cleans her feathers on Saturday afternoons. She can't play with Hippo's kite.

What about you, Snake?
Are you free this afternoon?

Sorry, Hippo.
I'm not free.

On Saturday afternoon, Snake sometimes sleeps in a tall tree. She can't play with Hippo's kite this afternoon.

What about you, Monkey?
Do you want to fly my kite
with me?

I'm too busy. I'm
counting my toes.

Monkey likes Maths. He counts his fingers and toes every weekend because he likes learning about numbers. He can't play with Hippo's kite.

Crocodile sees Hippo behind a tree. He sees Hippo cry. Crocodile is never too busy for a friend.

Nature reserves in Oman

There are a lot of beautiful nature reserves in Oman and they are all very different. Let's look at three of them.

Daymaniyat Islands

The nine Daymaniyat Islands are a marine reserve. The fish, sharks, whales and dolphins are safe in the sea around the islands. You can't visit the islands from May to October. That's because turtles lay their eggs on their beautiful beaches.

Wadi rescue!

by Jasim

I visit my older cousin, Amjed. He lives in Sur.

We go canoeing together on the beautiful blue waters of Wadi Shab. There is a lot of water in the wadi today and we go very quickly down the wadi. This is harder than canoeing in a lake!

Suddenly, I see a big tree across the wadi! The canoe turns over. I swim to the side, but Amjed is on a rock in the middle of the wadi. His arm is hurt. He's cold and tired.

What can I do? Amjed can't swim because of his arm. I can't swim to him because it's dangerous.

Then I remember my whistle. We always carry whistles when we go canoeing. I find the whistle and I make the loudest sound I can! I blow six times. That's the emergency signal. Then I hear another whistle! Soon the helicopter is here. It takes Amjed to hospital. He's safe!

- 5 **After you read** Read the story again. Circle the correct word.

Boat driver in a cave

Many people can drive a boat, but not many drive boats in a cave! When people visit Speedwell Cavern in England, the boat driver takes them under the ground. Here, visitors can travel 200 metres under a hill and see a big underground lake. It's fun, but visitors must wear a special hard hat to keep them safe.

A professional sleeper

Do you have a comfortable bed? People who make or buy beds sometimes need a professional sleeper to check how good different beds are! To do this job, you must do experiments to see how well you sleep on a lot of different mattresses and pillows. Some beds are better than others, so professional sleepers don't expect to sleep for eight hours every night! How many hours do you sleep a night?
